Main purpose of this day

Thank you for taking time out of your busy schedule to attend the information session today.

As part of our manufacturing DX, we have worked with our business partners to develop a strong manufacturing structure.

We are making improvements to issues such as mistakes in information that have been returned, requirements and requirements that have been mismatched prior to the drawing.

In particular, for direct data sharing in CATIA V6 cloud environments, and for digital-based schedule matching and problem matching

Prompting the process construction is important in achieving operational efficiency improvements.

Today, we will explain how to collaborate with our design using the Digital Collaboration Environment, and the necessary administrative procedures for use.

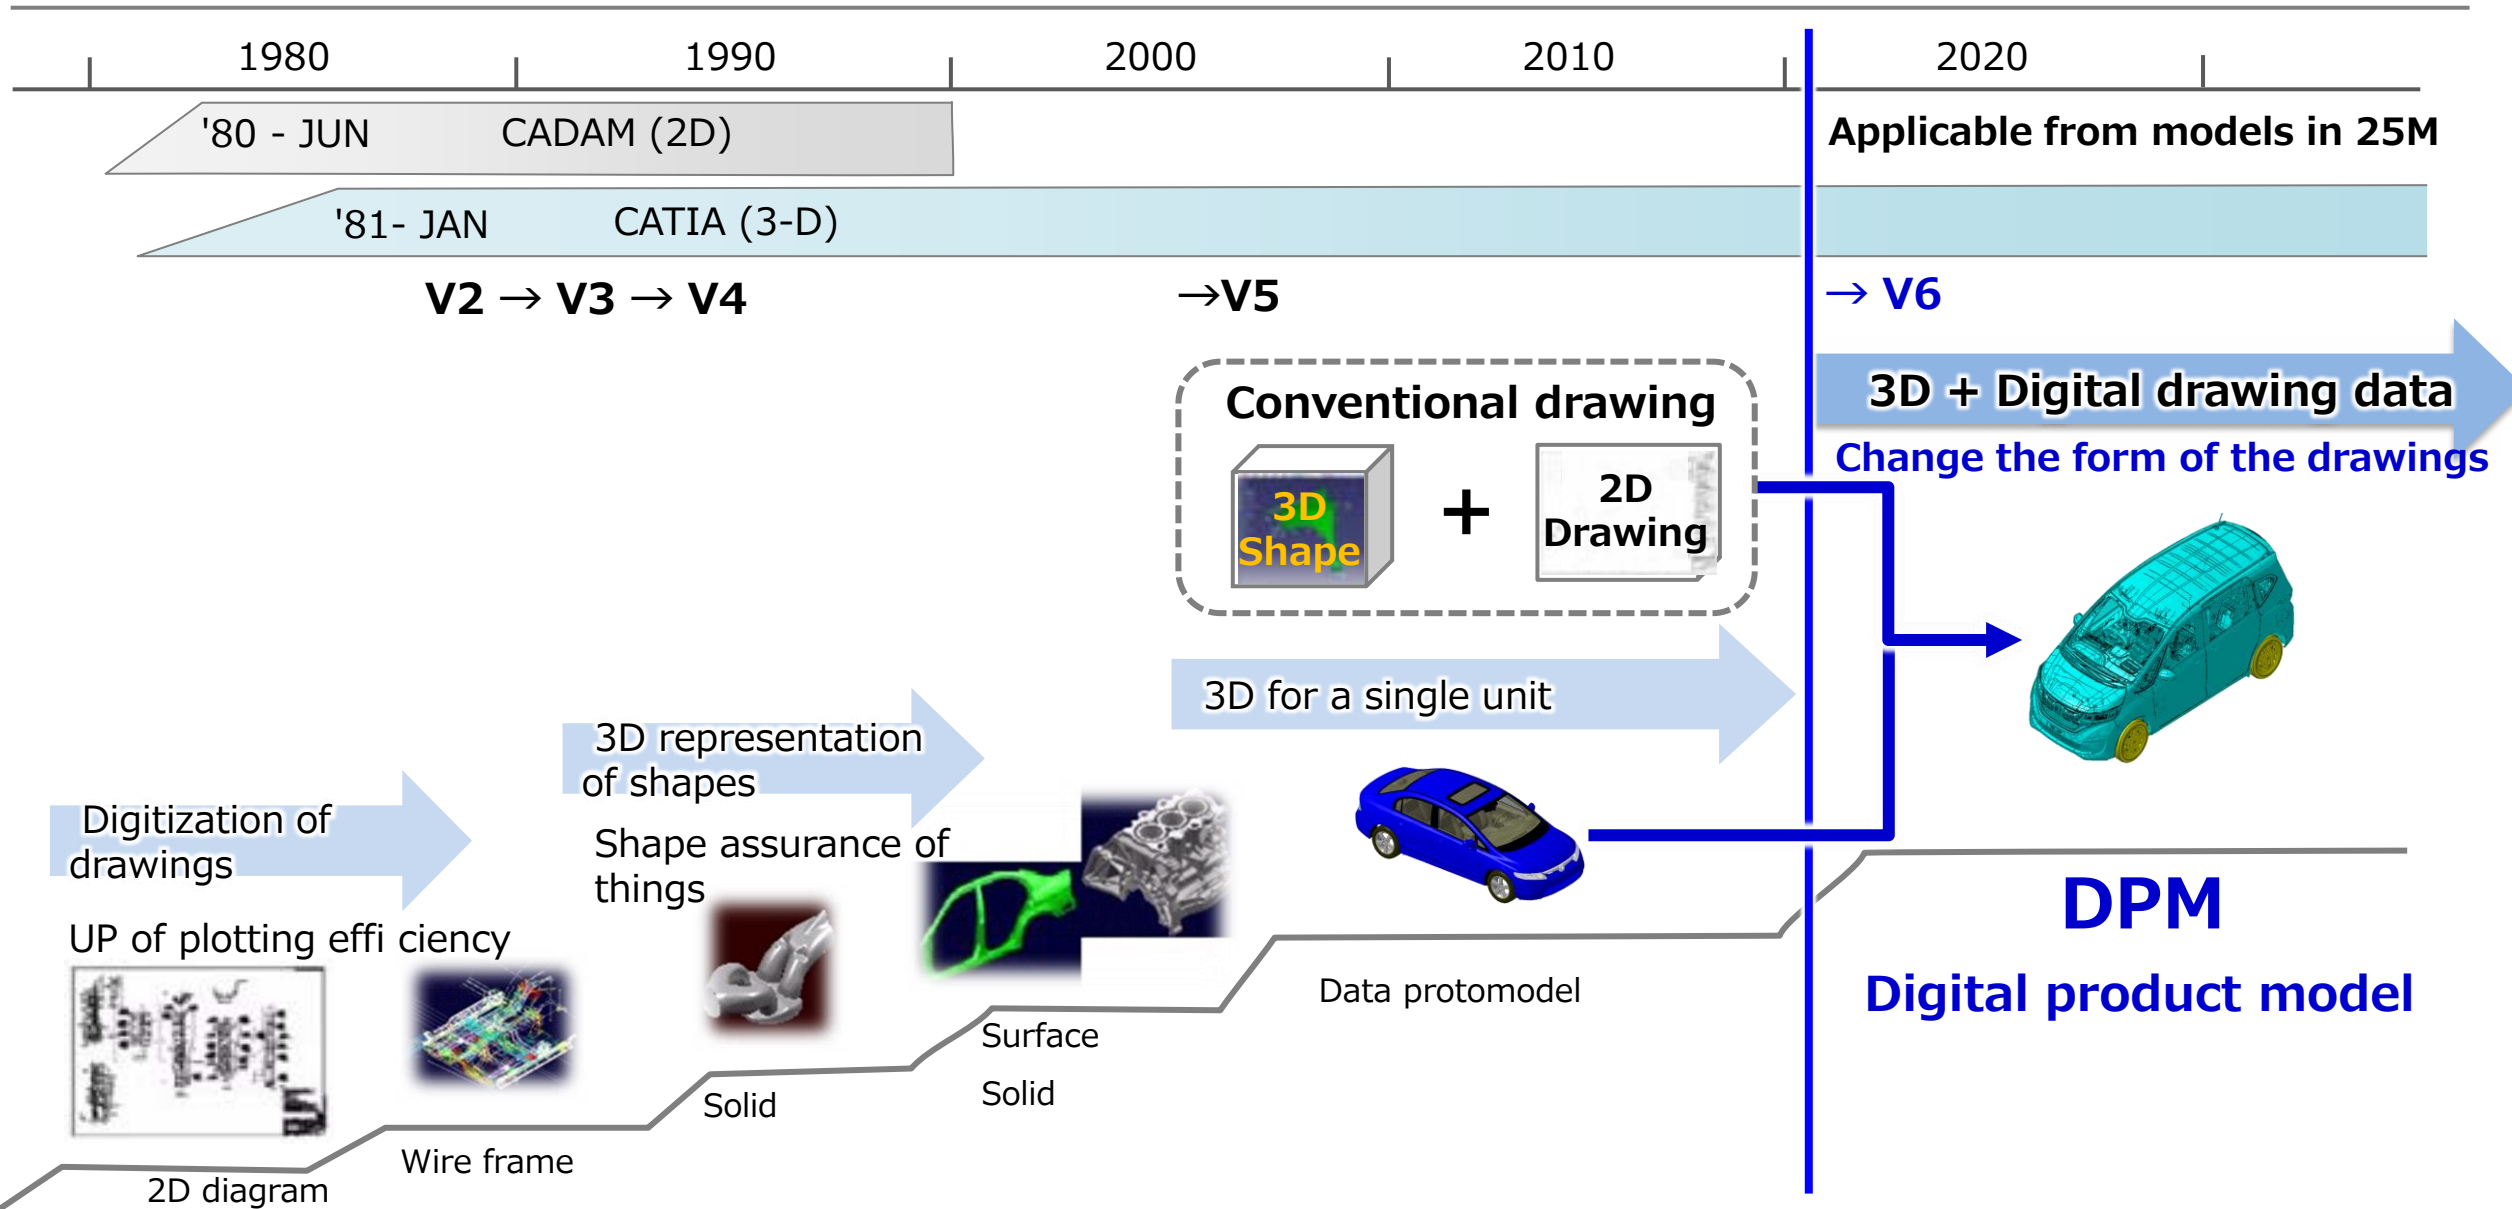

We plan to begin using CATIA V6 and Digital Collaboration Environment in HRAP around September 2025. For each supplier, please accept CATIA V6 drawings and prepare for delivery.

Agenda

Explanation : 70 mins

Evolution of IT Tools: Introduction of CATIA V6

Drawing form and CAD software are greatly evolving, and it is in the stage of full digital utilization.

CAD NEWS which was issued on April 29, 2022.

<CATIA V6 Applicable Steps>

Applicable Steps	Step 1	Step 2	Step 3
	Introduction Phase	Expansion Phase	All applicable Phase
Start timing	Since May, 2021	Since July, 2022	Since June, 2023
Range of Application	Applied to 25M domestic development models only	Applied sequentially from NM/FMC development models from 27M onward	Applied sequentially from newly developed models such as MMC-developed and R/DR-developed models
Honda drawing	Limited application to shed parts	All application	All application
Maker drawing	Limited application to 9 companies	Sequential application	All application

<CATIA V6 Application Roadmap>

		2021	2022	2023	2024	2025	2026	2027
Applicable steps		V5/V6 combined period						V6 unification
		Step①	Step②	Step③				
Range and time of application	Japan	▼'21/5	▼'22/7	▼'23/6	③All of MMC, R/DR etc. Applied sequentially from the development of new models			
				②NM/FMC(27M~)	Applied sequentially from the development of new models			
				①Model limited(25M)				
	North America		▼'22/8	▼'23/6	③All of MMC, R/DR etc. Applied sequentially from the development of new models			
				②NM/FMC(27M~)	Applied sequentially from the development of new models			
	China		▼'22/8	③All of NM/FMCMC, R/DR etc. Applied sequentially from the development of new models				
				②NM/FMC(27M~)	Applied from production area			
	Asia Pacific		▼'22/9	③All of NM/FMCMC, R/DR etc. Applied sequentially from the development of new models				
				②NM/FMC(27M~)	Applied from production area			
	South America				③All of NM/FMCMC, R/DR etc. Applied sequentially from the development of new models			
					②NM/FMC(27M~)	Applied from production area		

Apply CATIA V6 from 28.5M FMC starting in September 2024.

HONDA's Direction

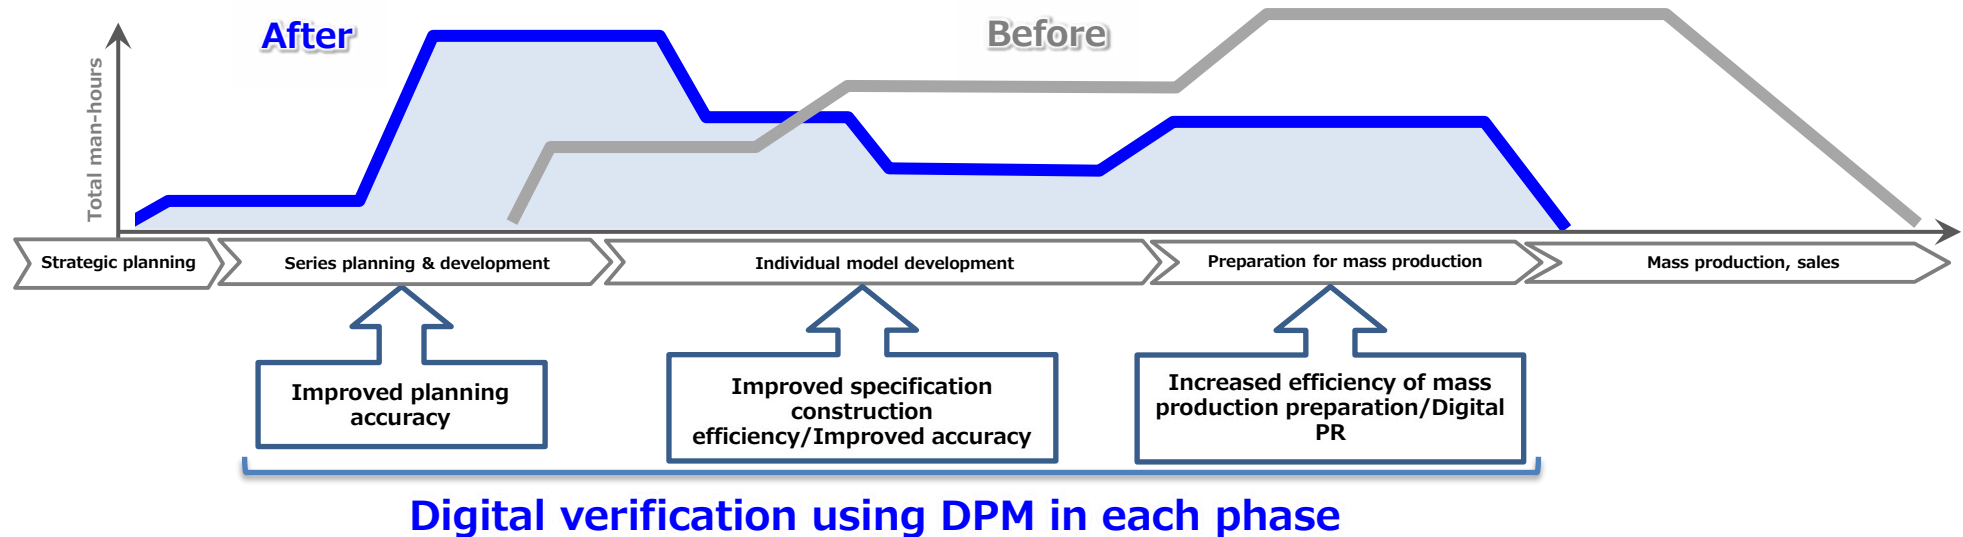

Honda has set new environmental & safety goals for 2025.

- Carbon neutral thru all Honda product and company activities
- Zero death caused by Honda motorcycle/automobile accident

To achieve these, Honda will focus on environment and safety.

Honda will continue to "solidify the existing business", which is the foundation for meeting our goals.

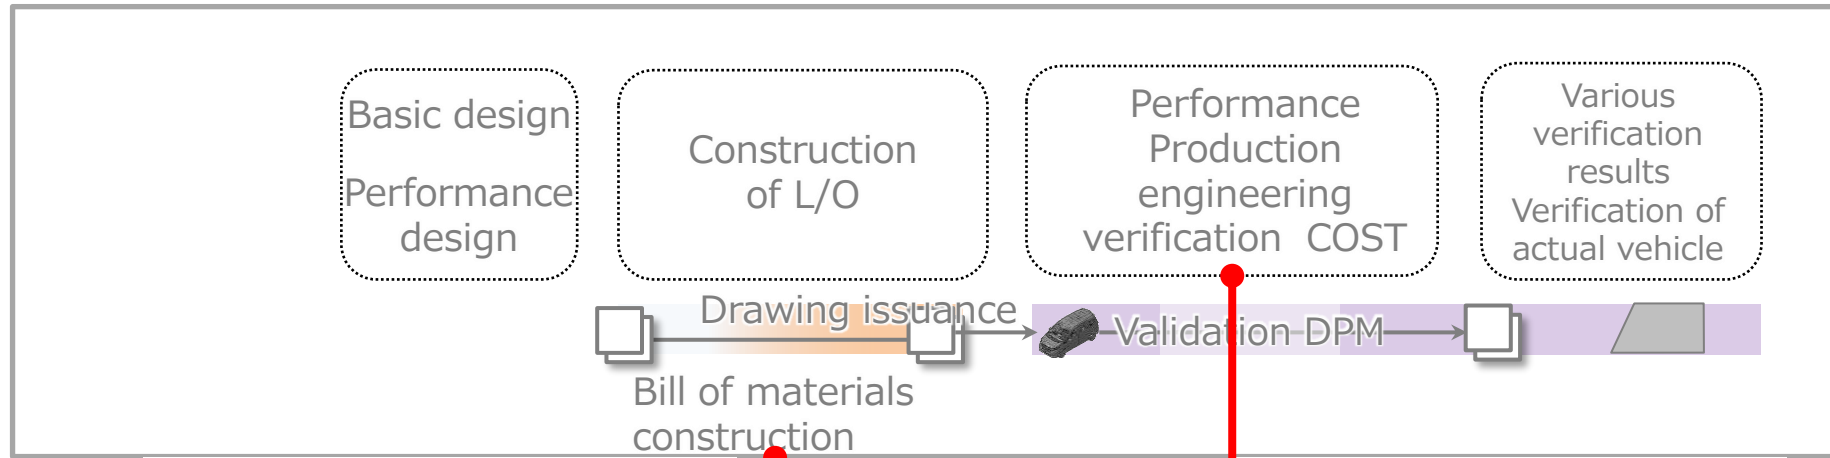

For automobile development, we have introduced a new series development flow which will allow Honda to increase parts commonality/usage for longer period. Through the execution of digital parts maturation and continuous manufacturability verification & collaboration, errors which cause rework for design can be eliminated and efficiency improved. Mass production quality can be guaranteed prior to drawing issue.

Achieve strong "Monozukuri" thru supplier digital collaboration in DPM-centric environment.

Evolution of Honda's development-process

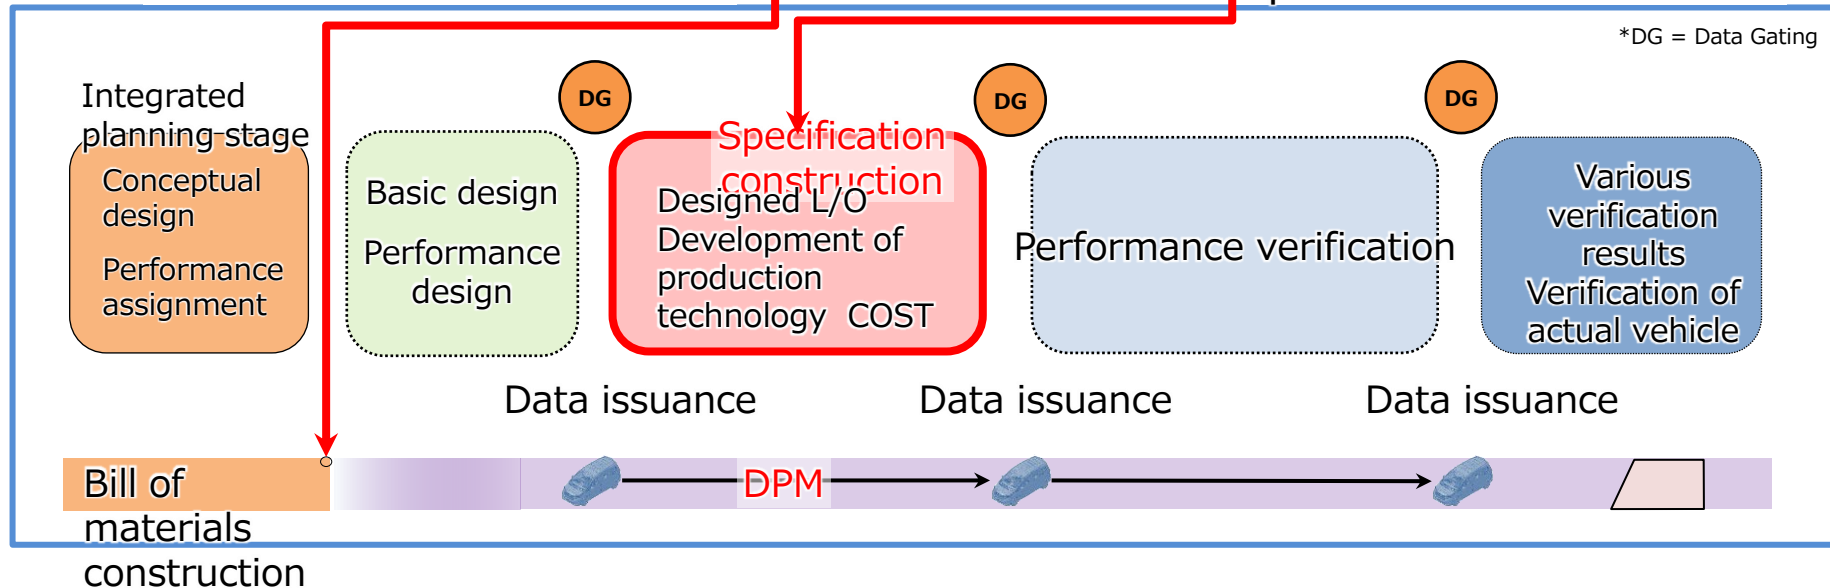

As is
Process

Point ①
Acceleration of
Bill of Materials construction

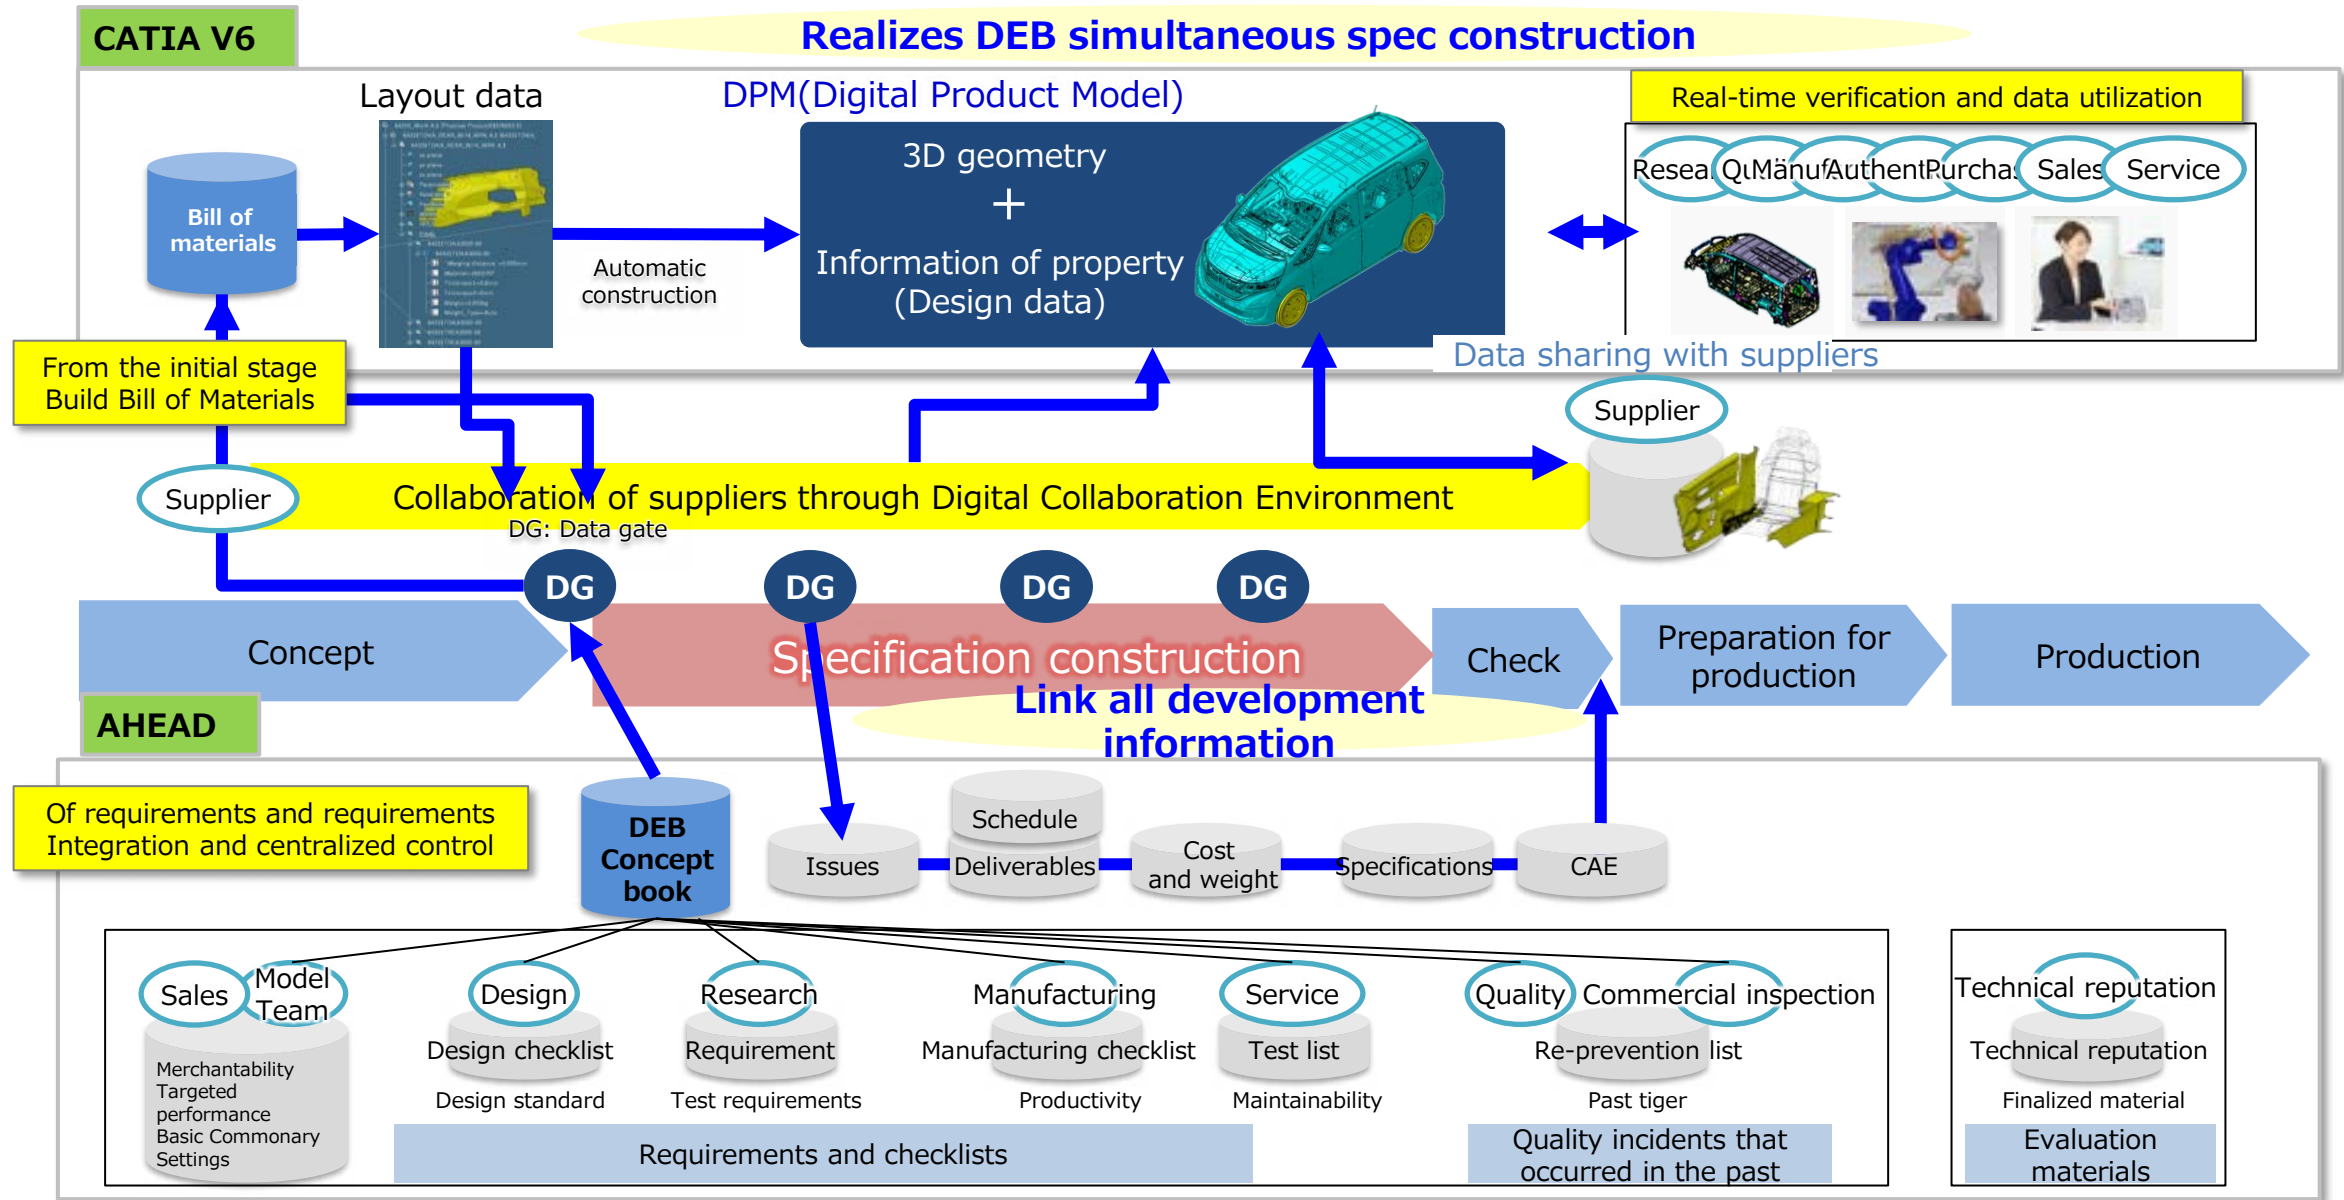

Point ②
Acceleration of
specification construction

NEW
Process

Our goal is to evolve from a verification system after drawing to an early specification-building process centered on DPM.

Key Measures to Realize DPM-Centric Development Style

We will improve the concern by having our suppliers participate in an environment that strengthens information coordination within HONDA.

Measure ①: DPM automatic construction

→ Quickly create data to be presented to suppliers without omission

Measure ②: Evolution of DWG

→ Improvement of accuracy and efficiency when utilizing information

Measure ③: Distributed data and evolution of data flow

→ Reduction of data conversion man-hours and support for various systems/format

Measure ④: Collaboration environment evolution

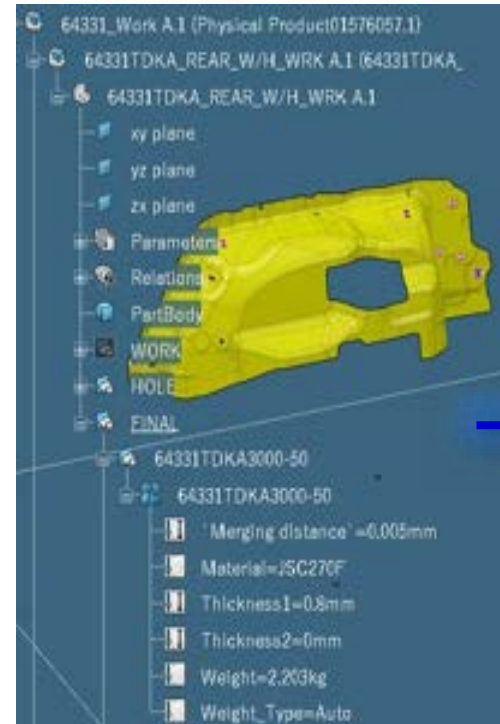

→ Efficient data sharing with suppliers and visualization of exchange history

Measure ①: DPM Automatic Construction

Current concern

- ◆ DPM is not delivered until after drawing is issued.
- ◆ Cannot check Layout data in timely manner.
- ◆ Due to DPM verification delays, data has to be reworked.

Solution

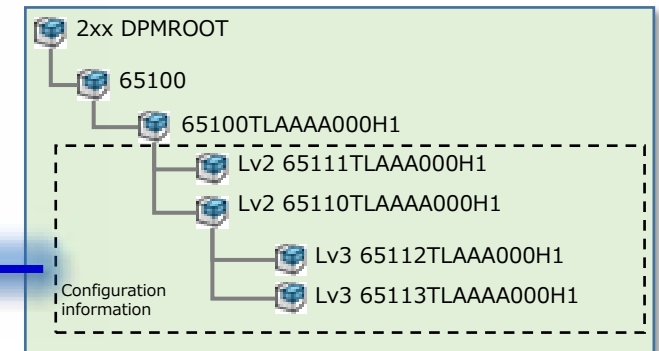

Layout data (3D)

Area where DPM will be "automatically built" and referenced.

SAVE

Automatic

BOM (Bill of Materials)

DPM will be automatically constructed from layout data and BOM and data presented to suppliers can be gathered quickly without exception.

Measure ②: Evolution of DWG

Current concern

- ◆ Modeling and drawing rules are different depending on the regions, functional group and PIC.
- ◆ It takes time to understand the intention of the previous PIC when reusing.
- ◆ It takes time to inspect the drawing.

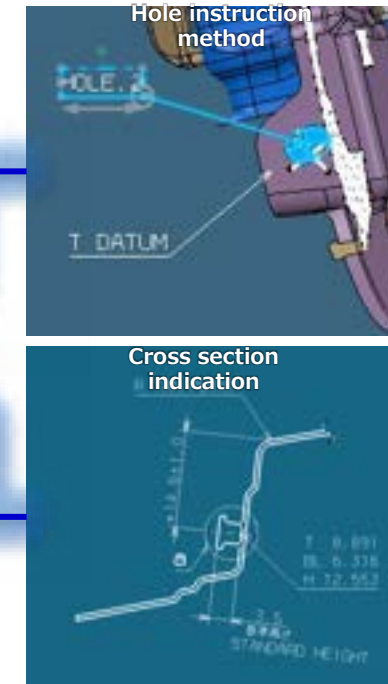

Solution

Standardize and set the rule for the storage destination of DWG information.

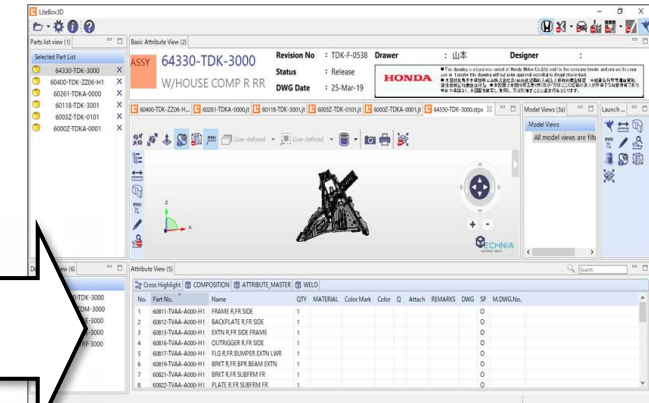

- • Hole information
- • Tolerance information
- • Cross section information
- • Standard Parts
- • Combine information

Unified DWG instruction method

"New DWG"

Directly use attribute information

Working standard

Weld plate assembly table

No.	Part No.	Name	QTY	MATERIAL	Color Mark	Color	Q	Attach	REMARKS	DWG	SP	M.DWG.No.
1	60811-TDAA-0001-H1	FRAME R/F SIDE	1									
2	60811-TDAA-0001-H1	BACKPLATE R/F SIDE	1									
3	60811-TDAA-0001-H1	EXTN R/F SIDE FRAME	1									
4	60811-TDAA-0001-H1	OUTRIGGER R/F SIDE	1									
5	60811-TDAA-0001-H1	PLATE R/F BEAM EXTN LOWER	1									
6	60811-TDAA-0001-H1	BRACKET R/F BEAM EXTN	1									
7	60811-TDAA-0001-H1	BRACKET R/F BEAM EXTN	1									
8	60811-TDAA-0001-H1	PLATE R/F BEAM EXTN	1									

Digitization of attribute information improves accuracy and efficiency when checking DWG and utilizing information.

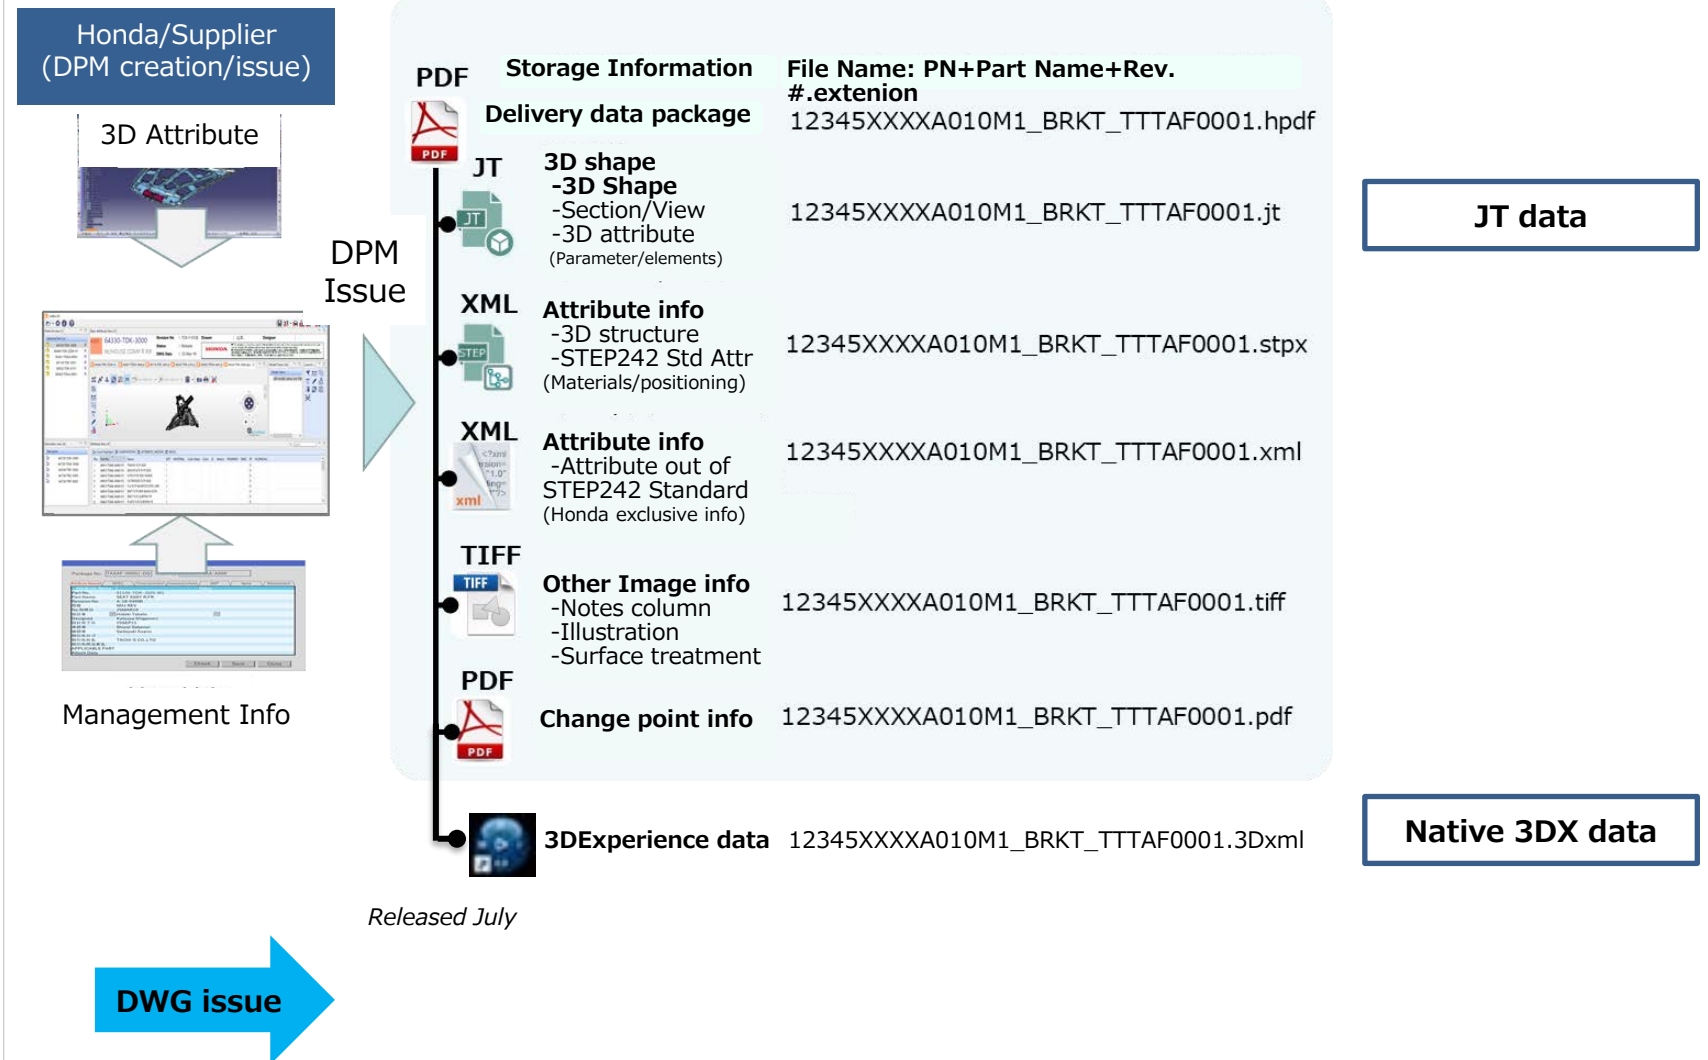

Measure ③: Distribution Data and Evolution of Data Flow

Current concern

- ◆ Data is only available in CATIA.
- ◆ CATIA data needs to be converted each time it is delivered.
- ◆ Data volume is too heavy, so it is difficult to handle. Data delivery is also inefficient.

Solution

Deliver in standard format

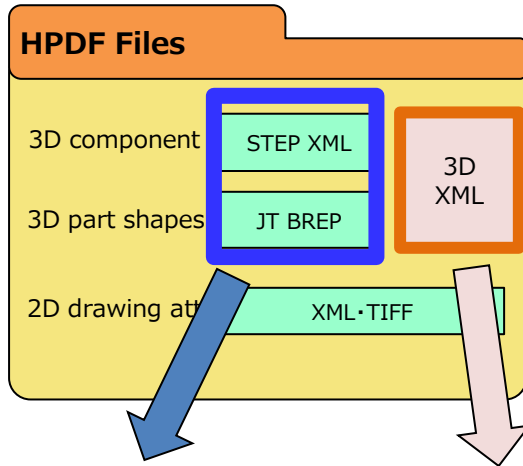

The standard format conforming to international standards reduces data conversion man-hours and can be used directly with various tools of suppliers.

Changes in Drawing Format

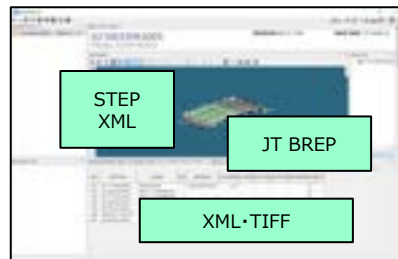

3DXML formalization (2/19 ~)

Positive: 3dxml+XML+TIFF
Positive: JT BREP+XML+TIFF

Shape confirmation data
DARWIN Viewer

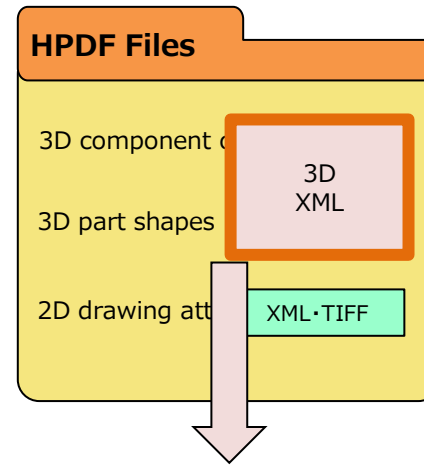

Design data
CATIA Viewer

Add 3DXML/CATIA Viewer
JT/DARWIN continues

3DXML unification JT halted (from Oct. 7)

Positive: 3dxml+XML+TIFF

Design data
CATIA Viewer

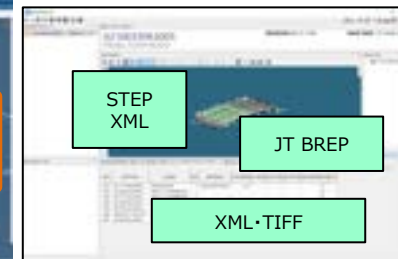

Formally, 3DXML, JT responds to requests
Sending data separately

Response to JT halt

Shape confirmation data
DARWIN Viewer

JT full stop ('25/1~)

Positive: 3dxml+XML+TIFF

Design data
CATIA Viewer

Officially 3DXML/CATIA Viewer
Unification

※Please check the previously issued drawings in JT/DARWIN.

Transition to 3DXML/CATIA Viewer from 7th October 2024

Current concern

- ◆ Late sharing of L / O and surrounding parts to suppliers
- ◆ It is unclear whether the presented data is up to date.
- ◆ Rework occurs by referring to old data.
- ◆ Man-hours for data sharing and transmission / reception are large.
- ◆ No history of exchanges remains.

Solution

Collaboration space

- Store the latest data
- Manage history
- Set for each supplier

Cloud environment

Direct access

Direct access makes sharing the latest product data much faster, and history management reduces rework.

Agenda

Explanation : 70 mins
Q&A : 45 mins

No.	Item	Time (Minutes)	Presenter
1	Opening speech ▪ Today's purpose	5	HRAP Funakoshi SMG
2	Outline of Honda initiatives ▪ Evolution of Honda's development-process and key measures Business Partner Collaboration Initiatives ▪ Vision for Joint Creation with Business Partners ▪ Collaboration environment evolution	20	HRAP CIS Attawit
3	Environment cost and system configuration Administrative Procedures for Starting Use of the environment	20	ASH IT Aikawa
4	Methods for Applying CATIA V6 Practices Deployment plan	20	HRAP Funakoshi SMG
5	Summary	5	ASH IT Aikawa
6	Q&A	45	ASH/HRAP/HM ALL
7	Closing speech	5	HRAP Funakoshi SMG

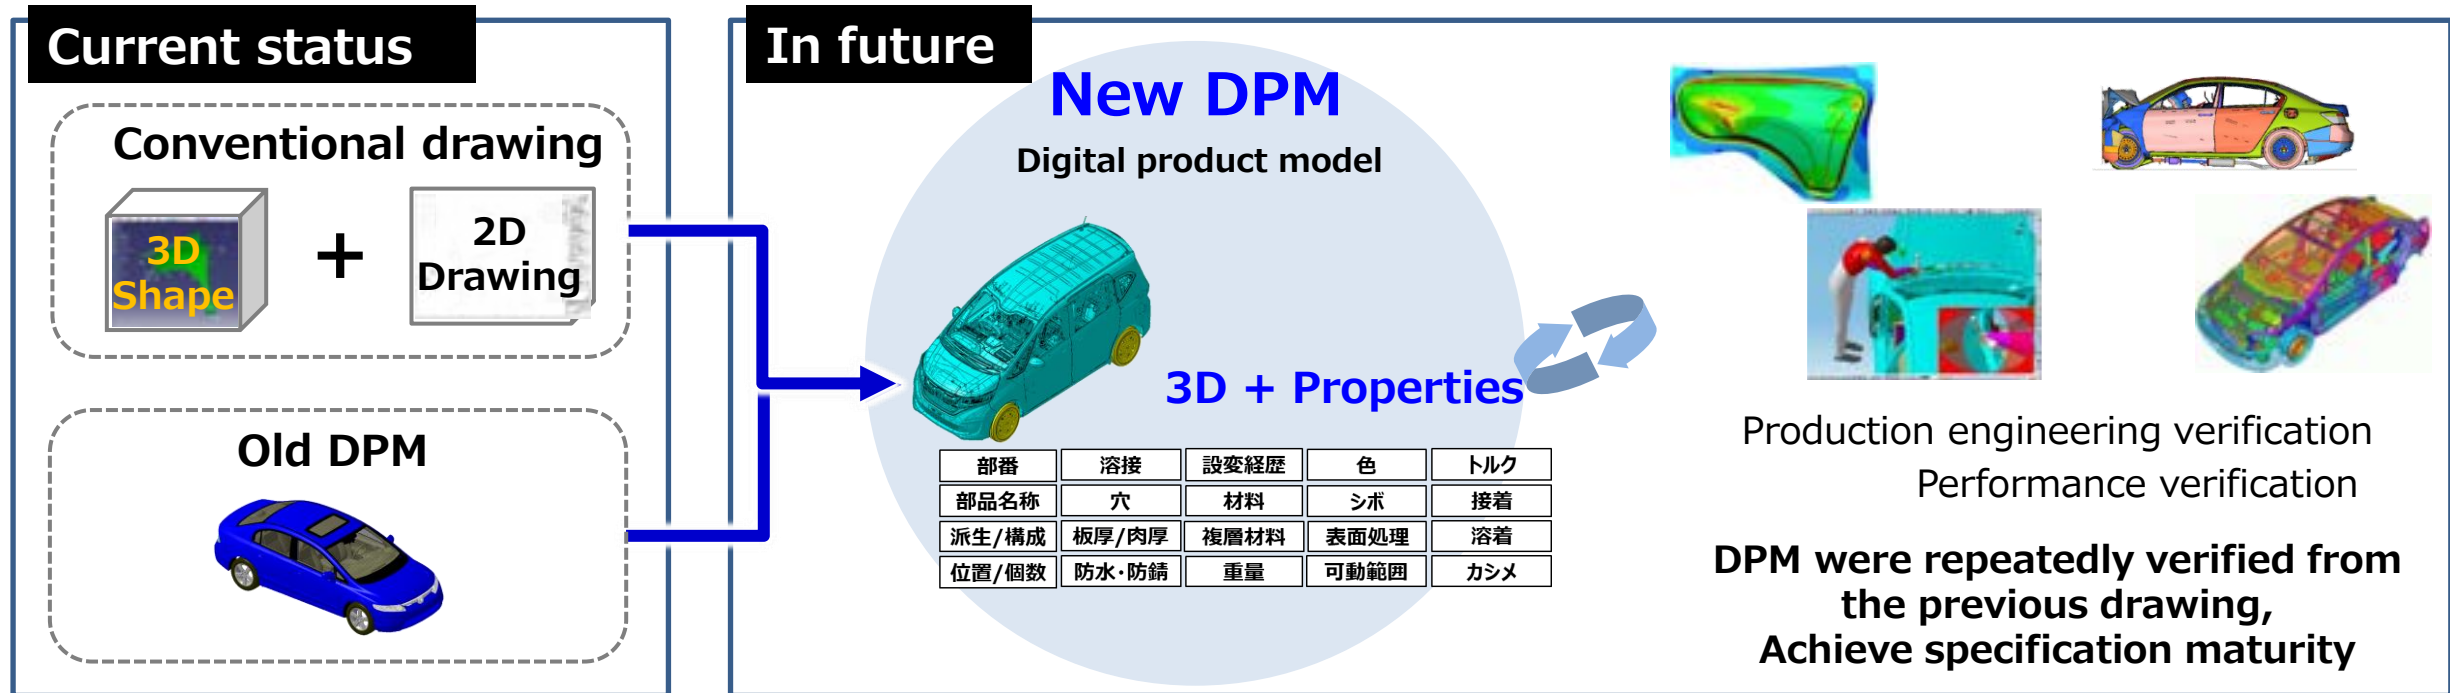

Vision for Joint Creation with Business Partners

At present, the main issues in collaboration with business partners are

- Delay in reflection of supplier skills
- Rework due to inadequate sharing of information, such as reference to old surrounding data
- Waste man-hours such as information copying and repeated input

We believe that improvement is indispensable.

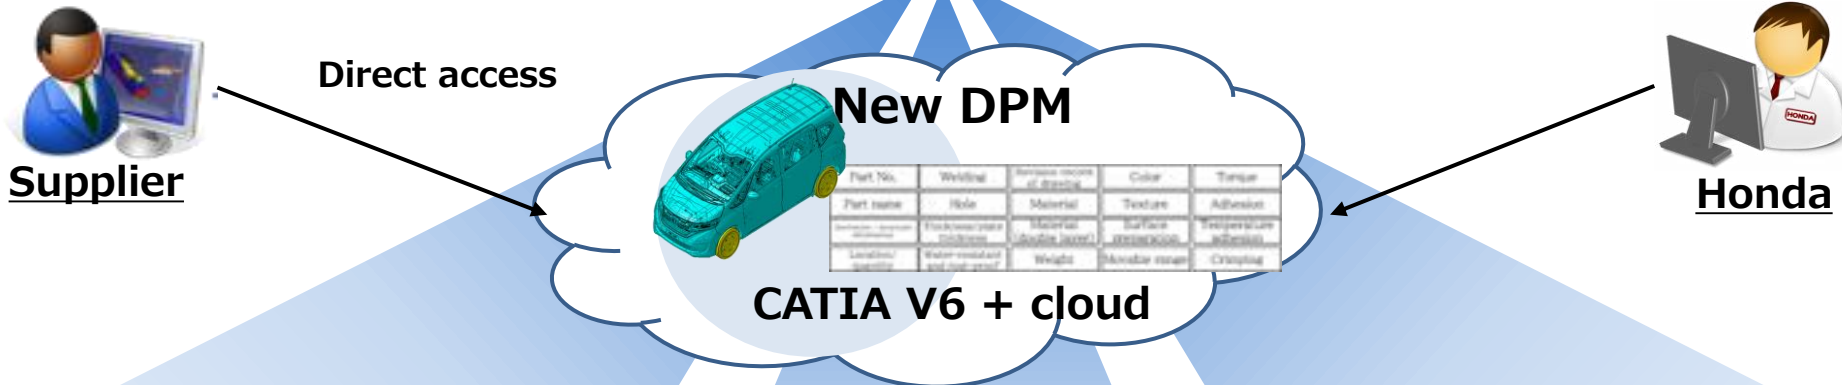

To solve this problem, we have developed a new DPM that digitizes the drawing data, and have developed and verified the product with our suppliers. We will do this efficiently.

We will solve conventional problems by building a new DPM that digitizes the drawing data.

Supplier Digital Collaboration Environment - Benefit

Strong manufacturing taishitsu without rework

- ① Information sharing accuracy + speed improvement

 - For early specification maturation, from the L / O stage efficiently build DPM and share quickly.
 - Development information (schedule / concern)
Can be shared accurately and quickly.
- ② Improvement of work efficiency for design PIC

 - Eliminates the double work of DPM construction and drawing.
 - Workload before DWG issue can be distributed.
 - With new DPM / standard format, improve convenience of data utilization at downstream data post-process.
- ③ Supports remote work style

 - Compatible with Honda development
Using the same method and rules regardless of region or country.
 - No work location restrictions.
 - Creating time by reducing travel.
 - Reduction in business trip expenses (stay expenses, transportation expenses, miscellaneous expenses).

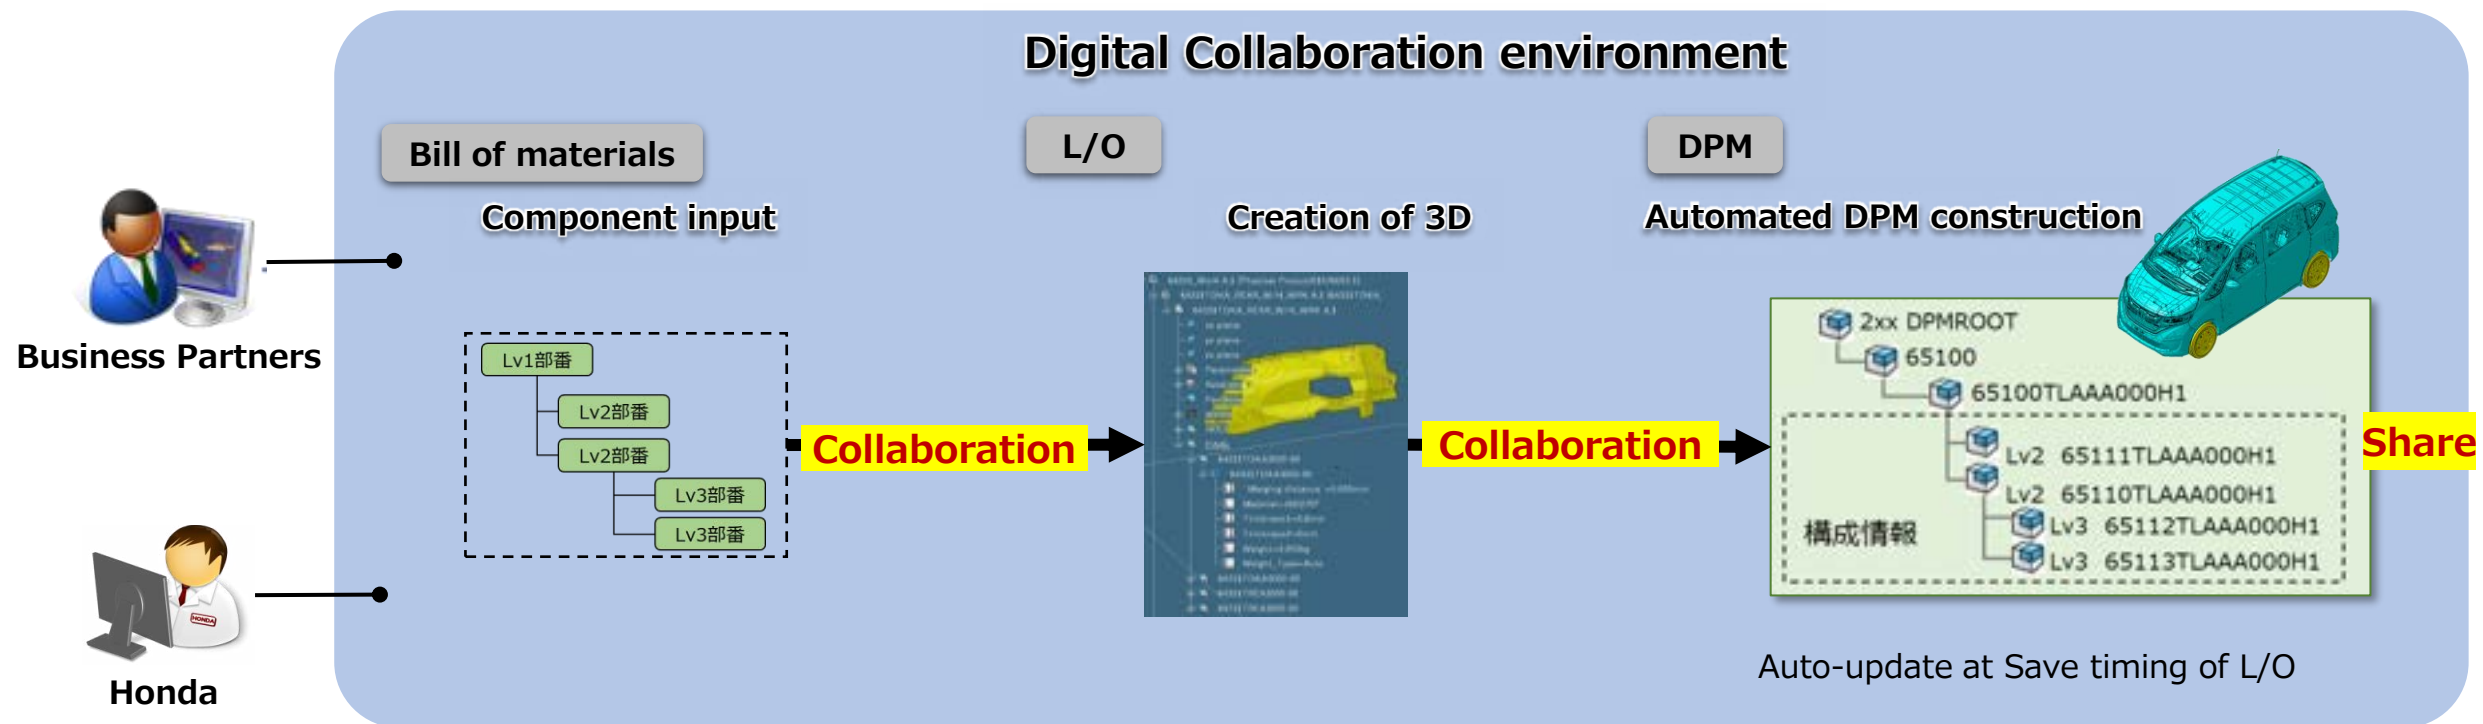

We aim to maximize the benefits by having our suppliers use this digital collaboration environment widely.

① Accuracy and speed of information sharing

19

[High-speed sharing of 3D by DPM auto-build function]

Component information entered in the Digital Collaboration Environment is linked to L/O data, and shared data can be created at high speed by DPM auto-build function that creates DPM data from L/O data.

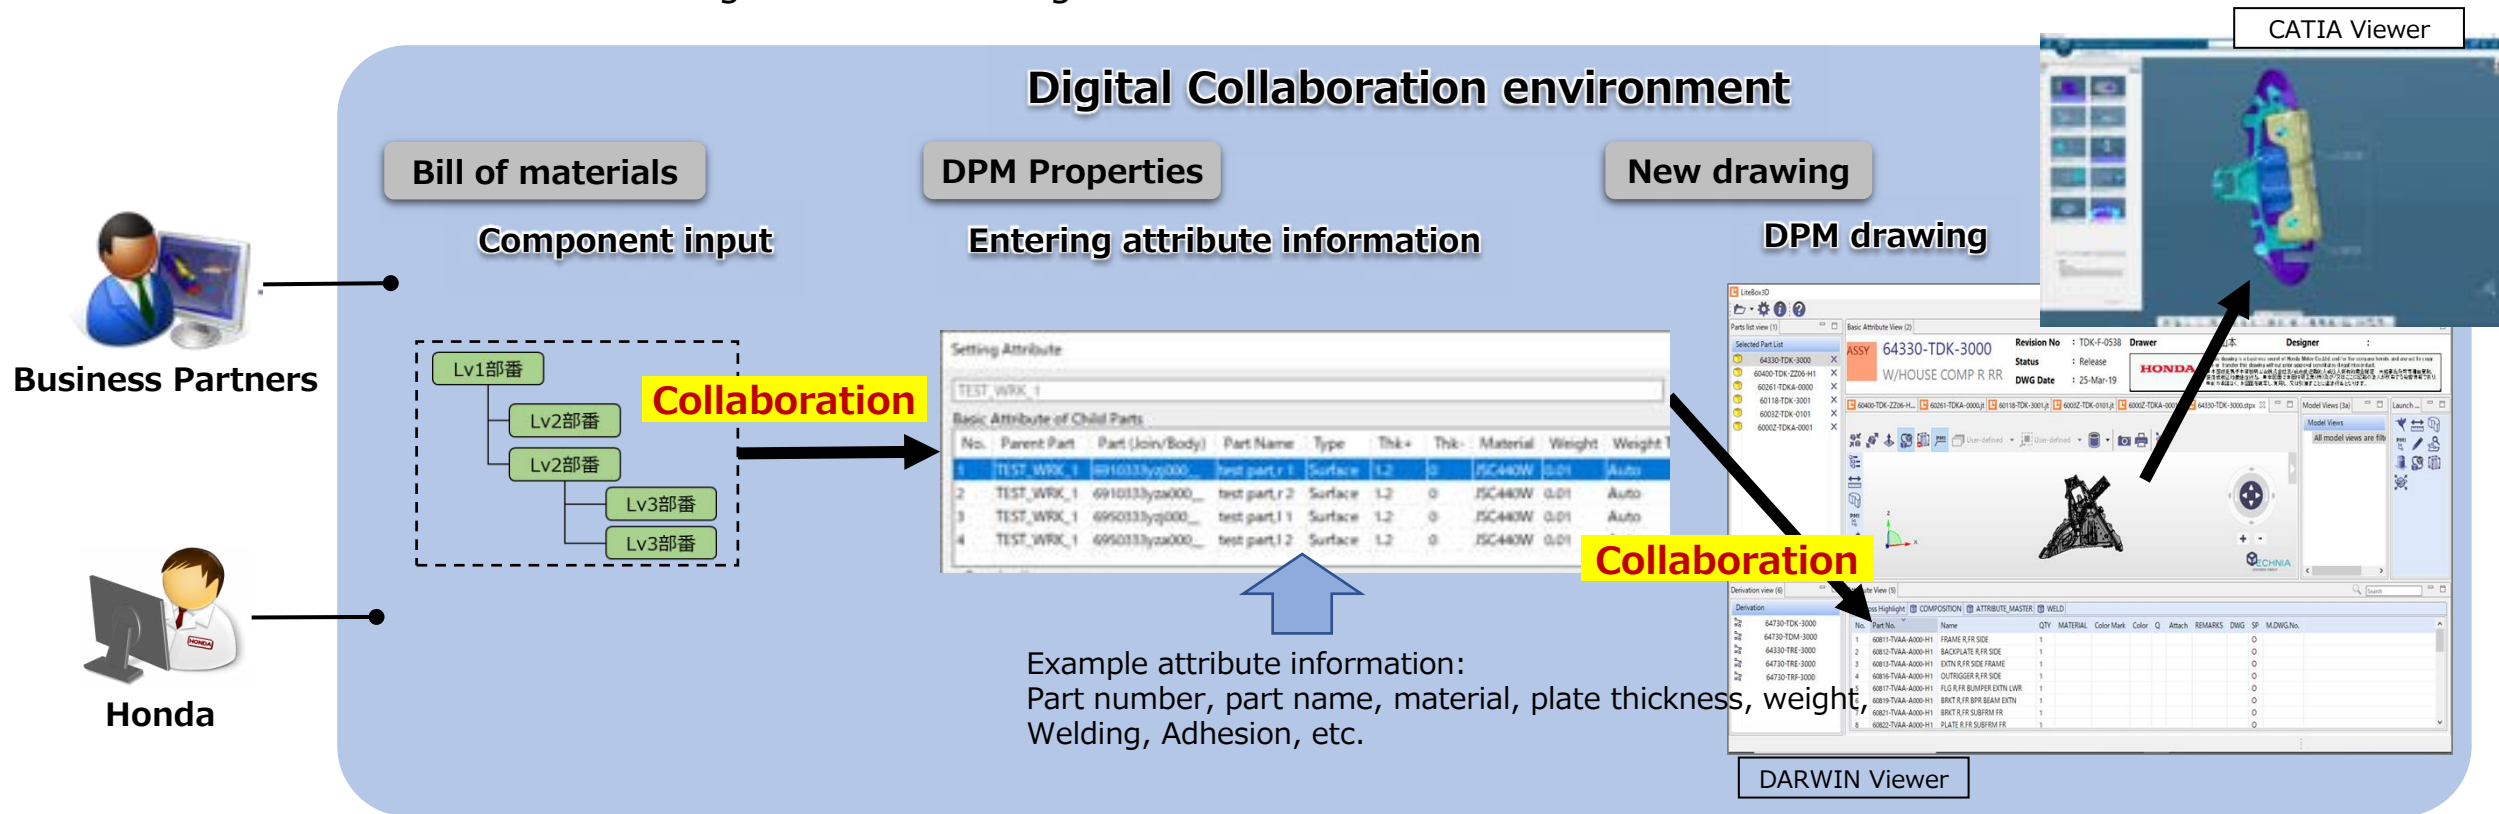

Achieve quick sharing of 3D data using a Digital Collaboration Environment

② Improvement of work efficiency for designers

[Produce efficient DPM and drawings by digitizing attribution data]

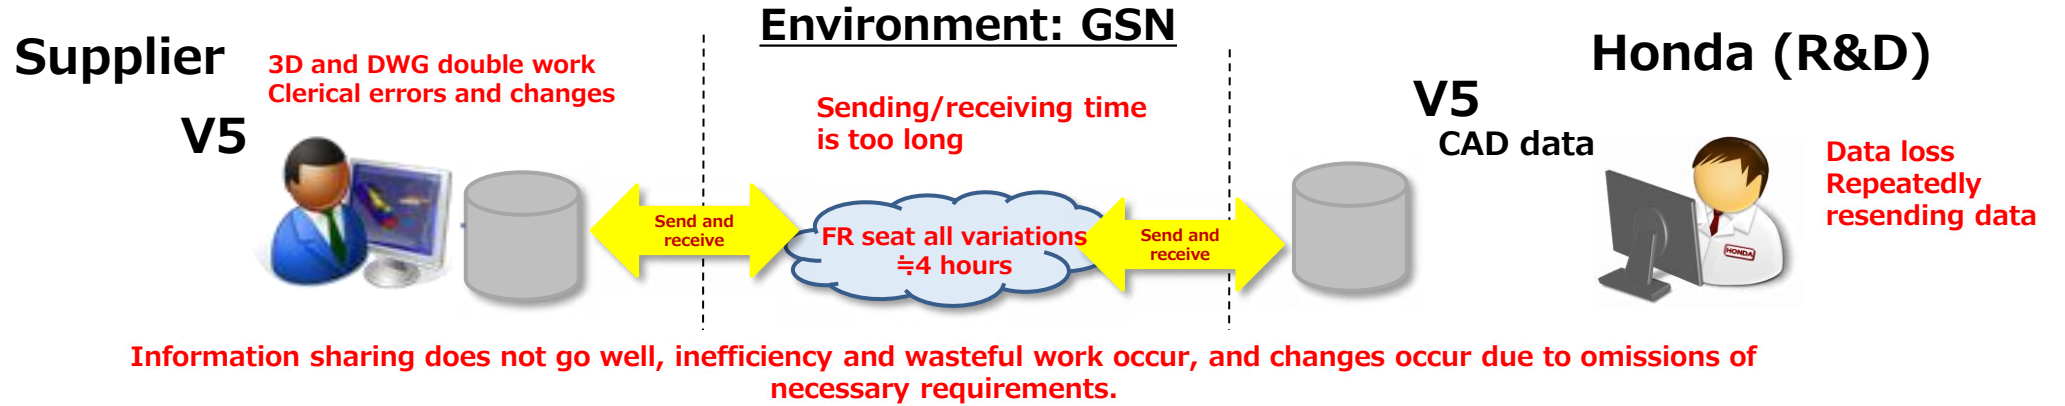

- The "box" for attribute input is automatically created from the component information entered in the digital Collaboration environment.
Input the attributes sequentially according to the specification decision.
- You can use this information to generate a drawing.

Use Digital Collaboration to enter properties to build and plot DPM efficiently

③ Supporting Remote Work Styles

Current

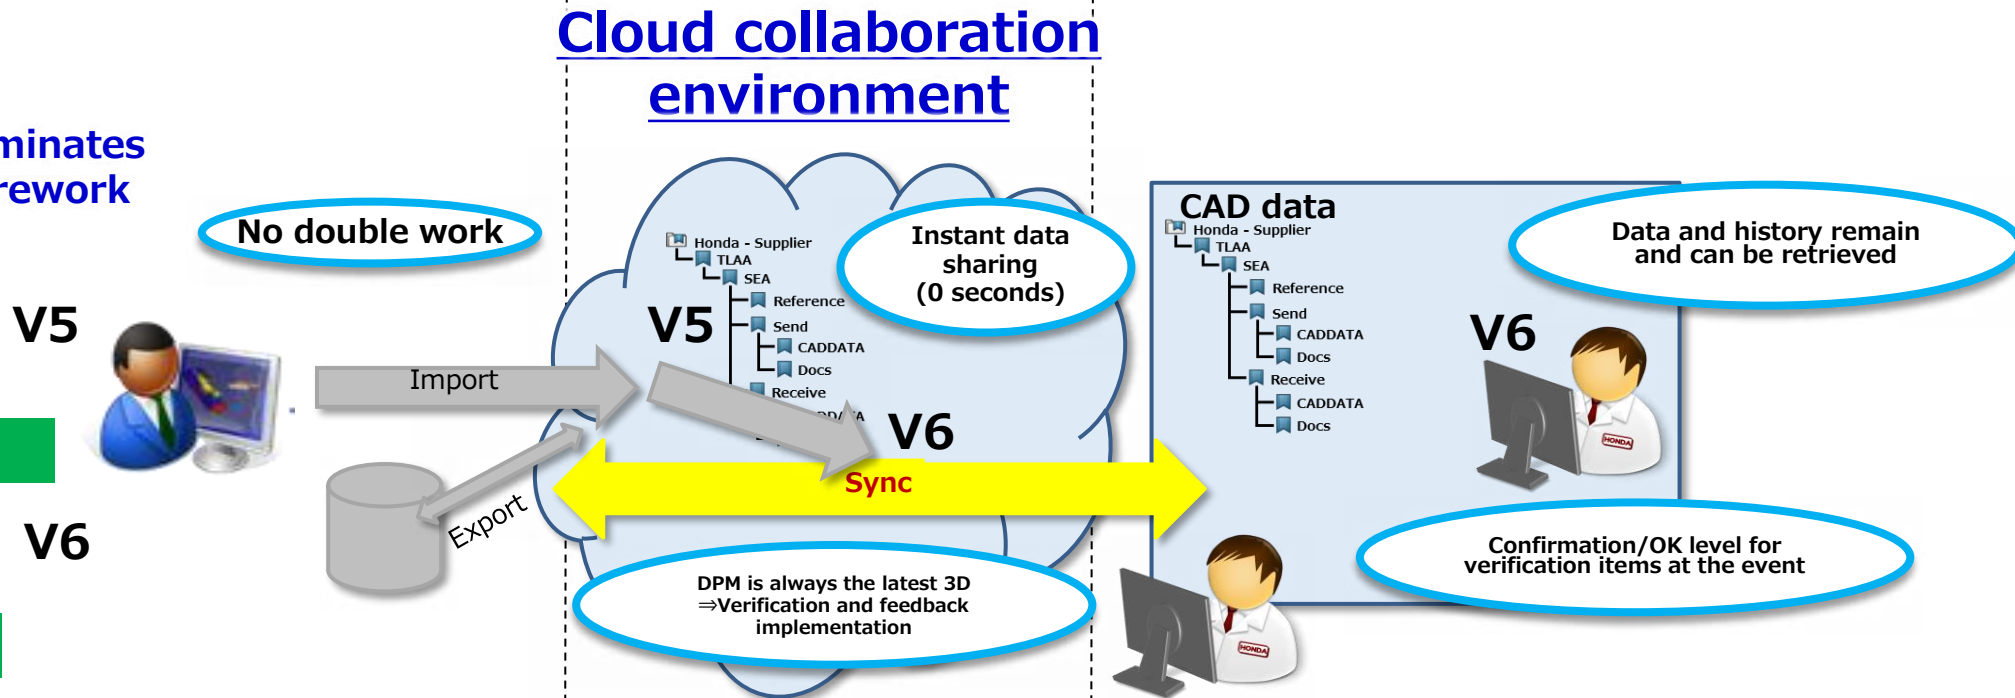

Future

Development that eliminates waste and prevents rework

Eliminate waste

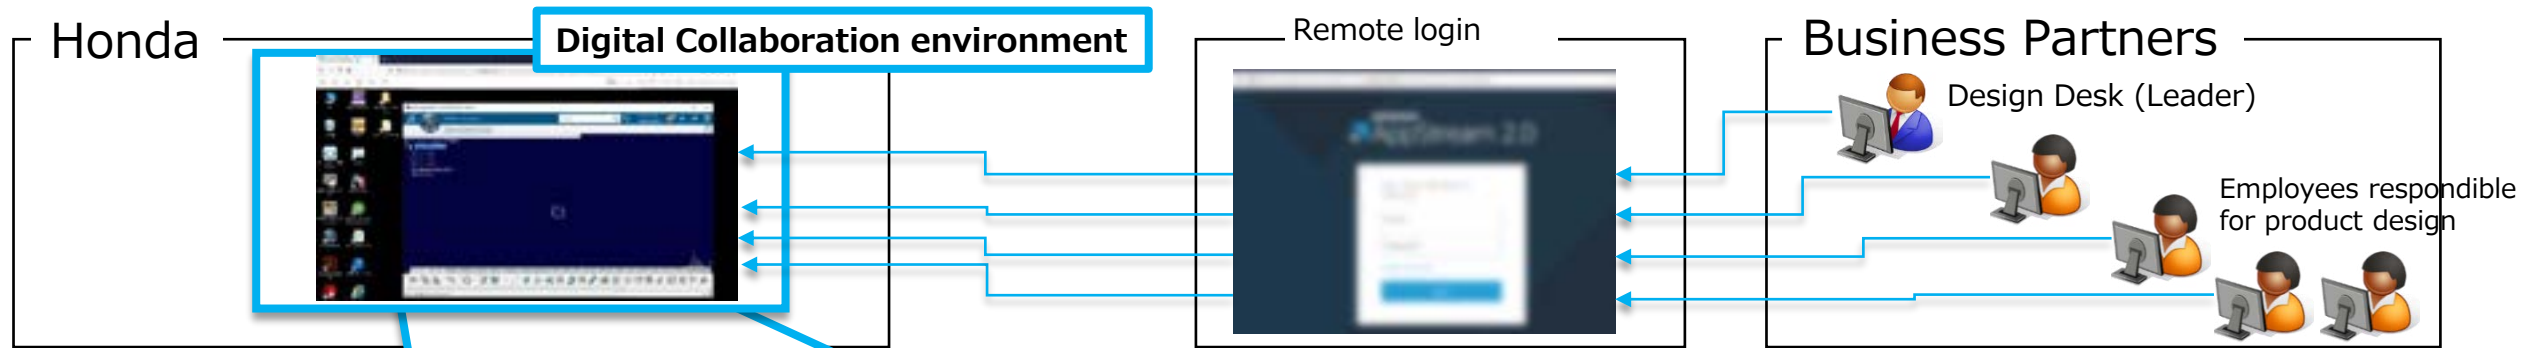

Prevent rework

You can access the collaboration environment on the cloud in-house, share CAD data, Development information and perform data construction work.

Digital Collaboration environment:

Environment in which business partner designers co-create with Honda on the cloud while still in their own offices

**Example of In-house Tools for Efficient Development****Data Sharing on the Cloud**

No more data can be sent or received
Instant data sharing

Component creation function

LV	Part No.	Part Name	Q
1	63720-32RX-N200-H1		
2	63326-32RX-3000	PATCH,T/GA...	
2	63721-32RX-3000	GTR UP L,R...	
2	63722-TDK -3001	EXTN L,RR P...	
2	63724-TDK -N000-H1	GTR LWR L...	
2	63725-TDK -N100-H1	ADPT L,RR ...	

Efficient UP of construction by importing
+ incremental correction

DPM construction function

Automatic
Collaboration

DPM automation

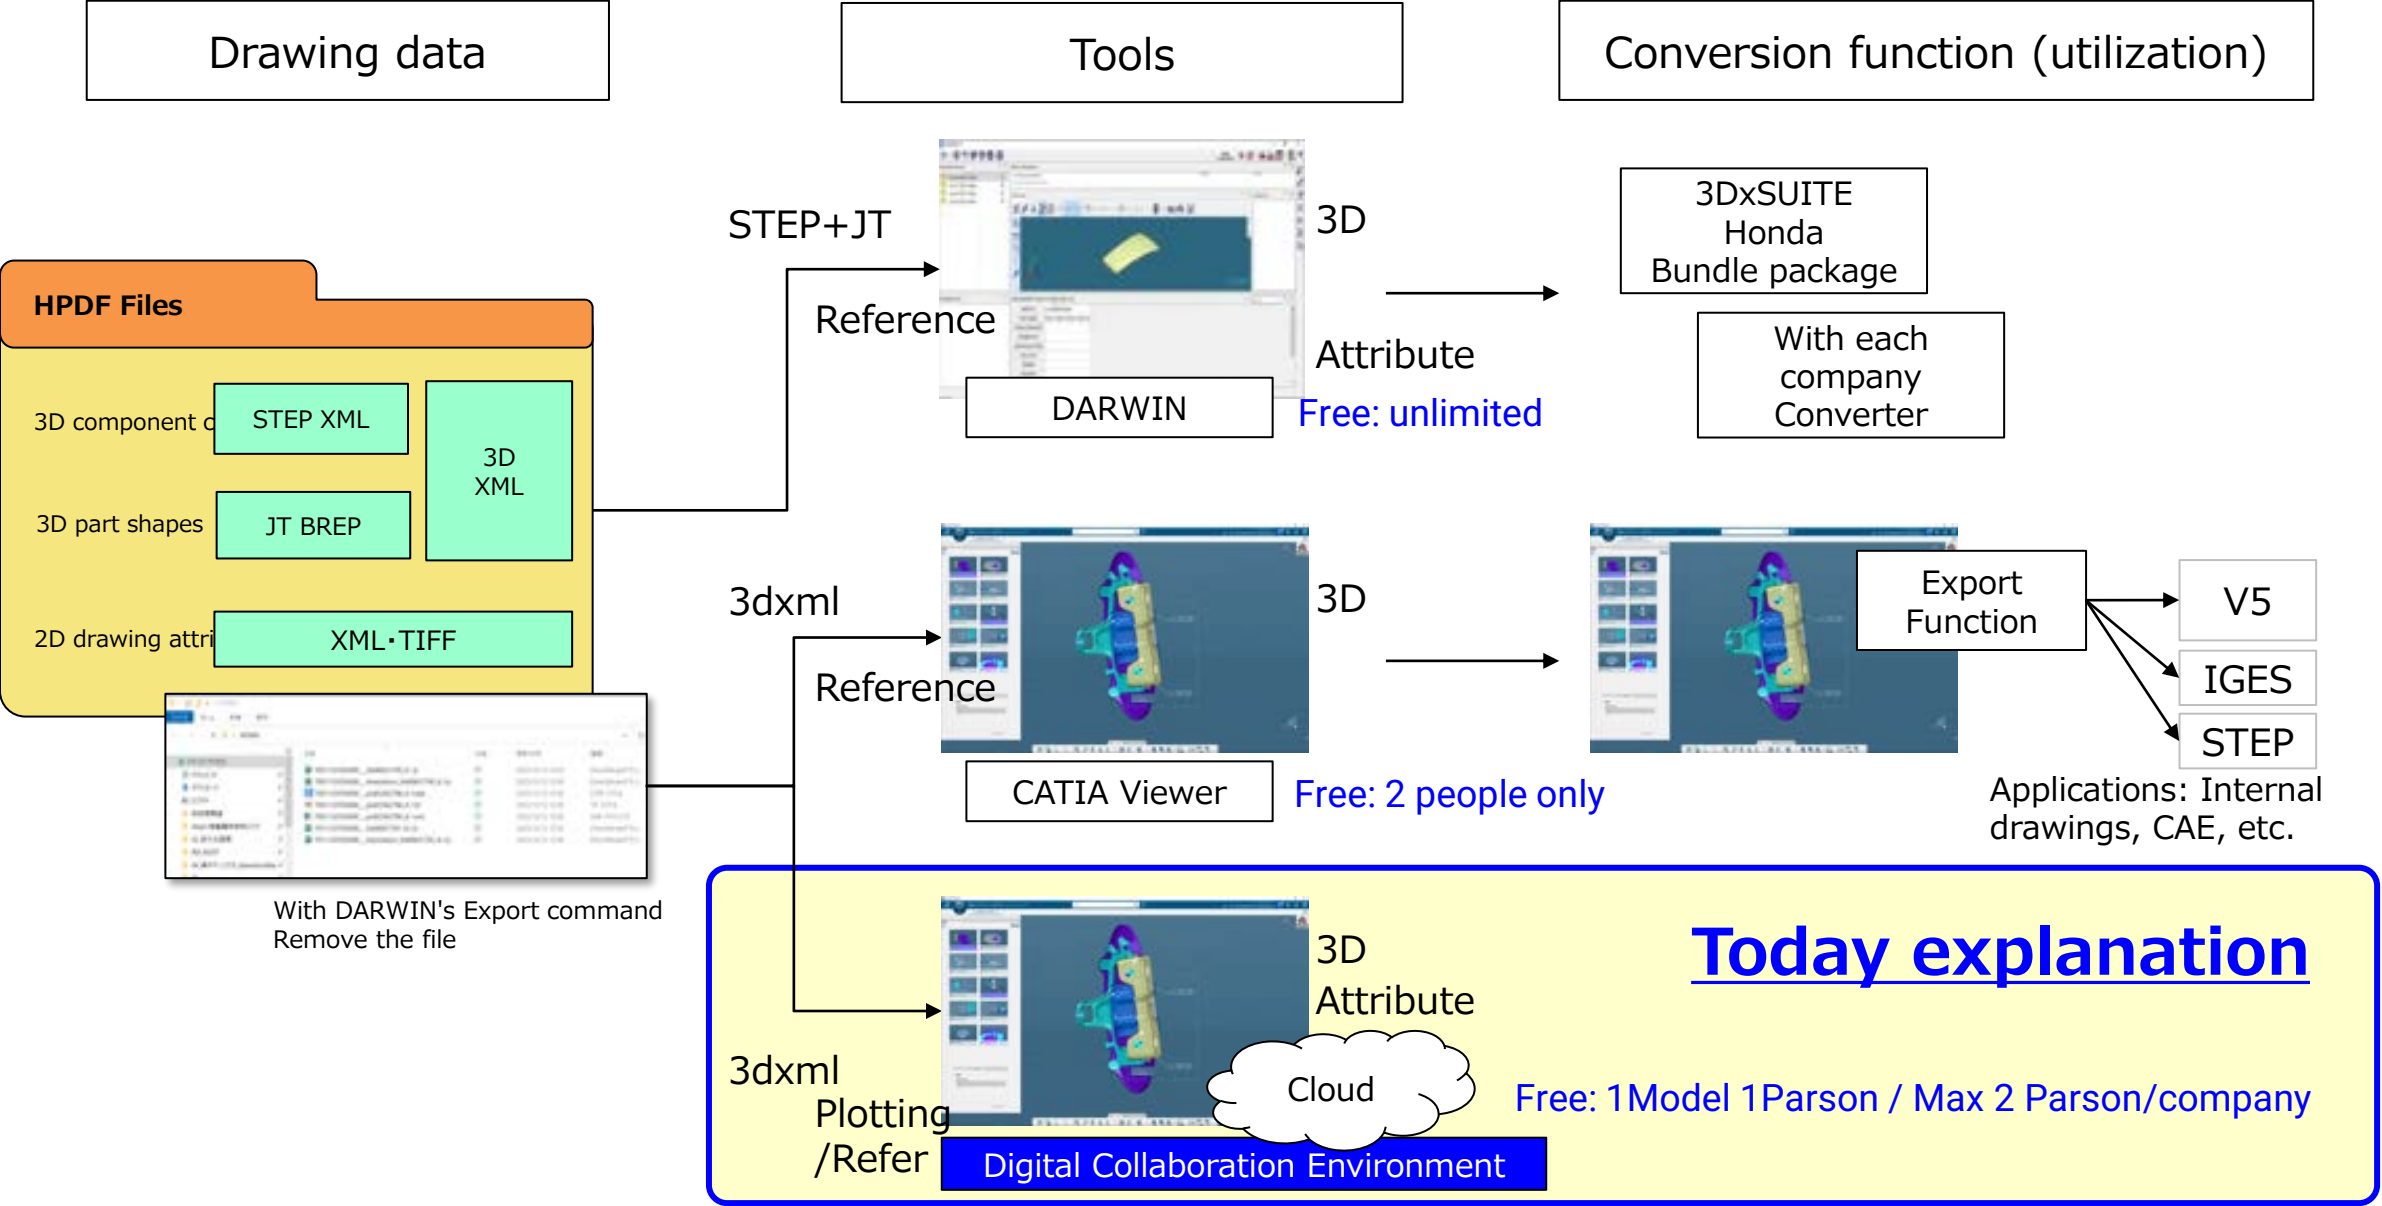

DPM data-viewing/extraction function

Shape check, attribute extraction

※Can be referenced only in-house and HM authorization.

Experiment with business partners using in-house Honda tools to improve development efficiency.
Then, lead to study of collaboration process.

Outline of drawing delivery formats and new Viewer

Provide DARWIN and CATIA Viewer for each company according to application

Environment cost (free/charged) rules

■ Cost rules:

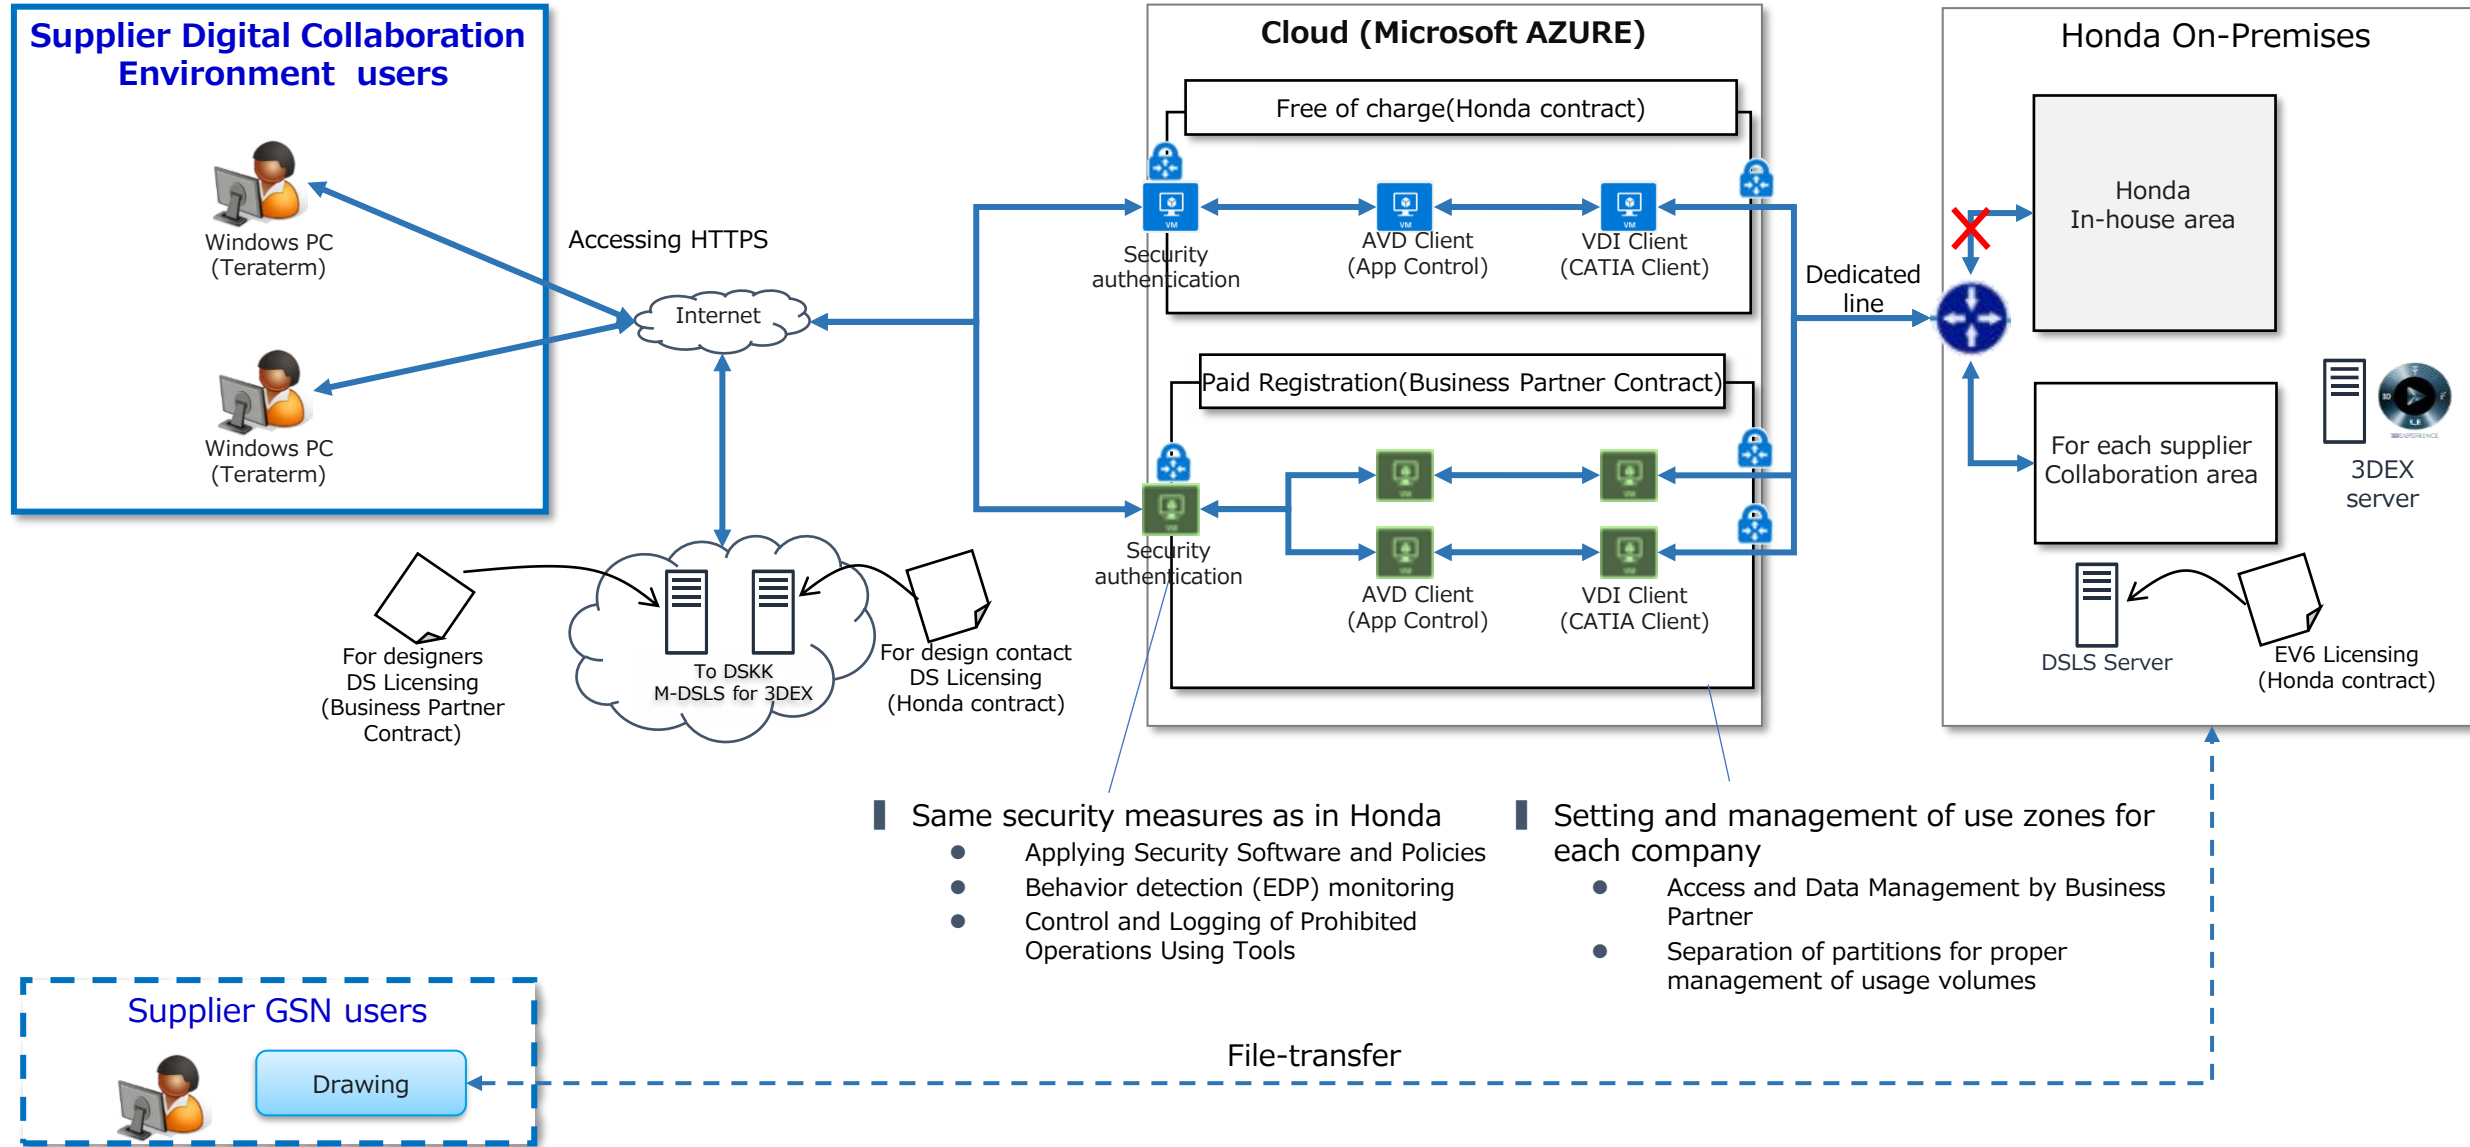

1 person per M/L for 1 model --> free of charge,

Max 2 person per company --> free of charge

If needed more, supplier will be responsible for cost

Project	Free of charge (Honda's responsibility)	Charge to supplier (Supplier's responsibility)			
A 	1 Person 	2 People 		3 People 	
B 	1 Person 				
C 	—	1 Person 			

Digital Collaboration Environment configuration

Supplier will use the cloud environment to access the Honda environment.

Requirements for Supplier side Environment

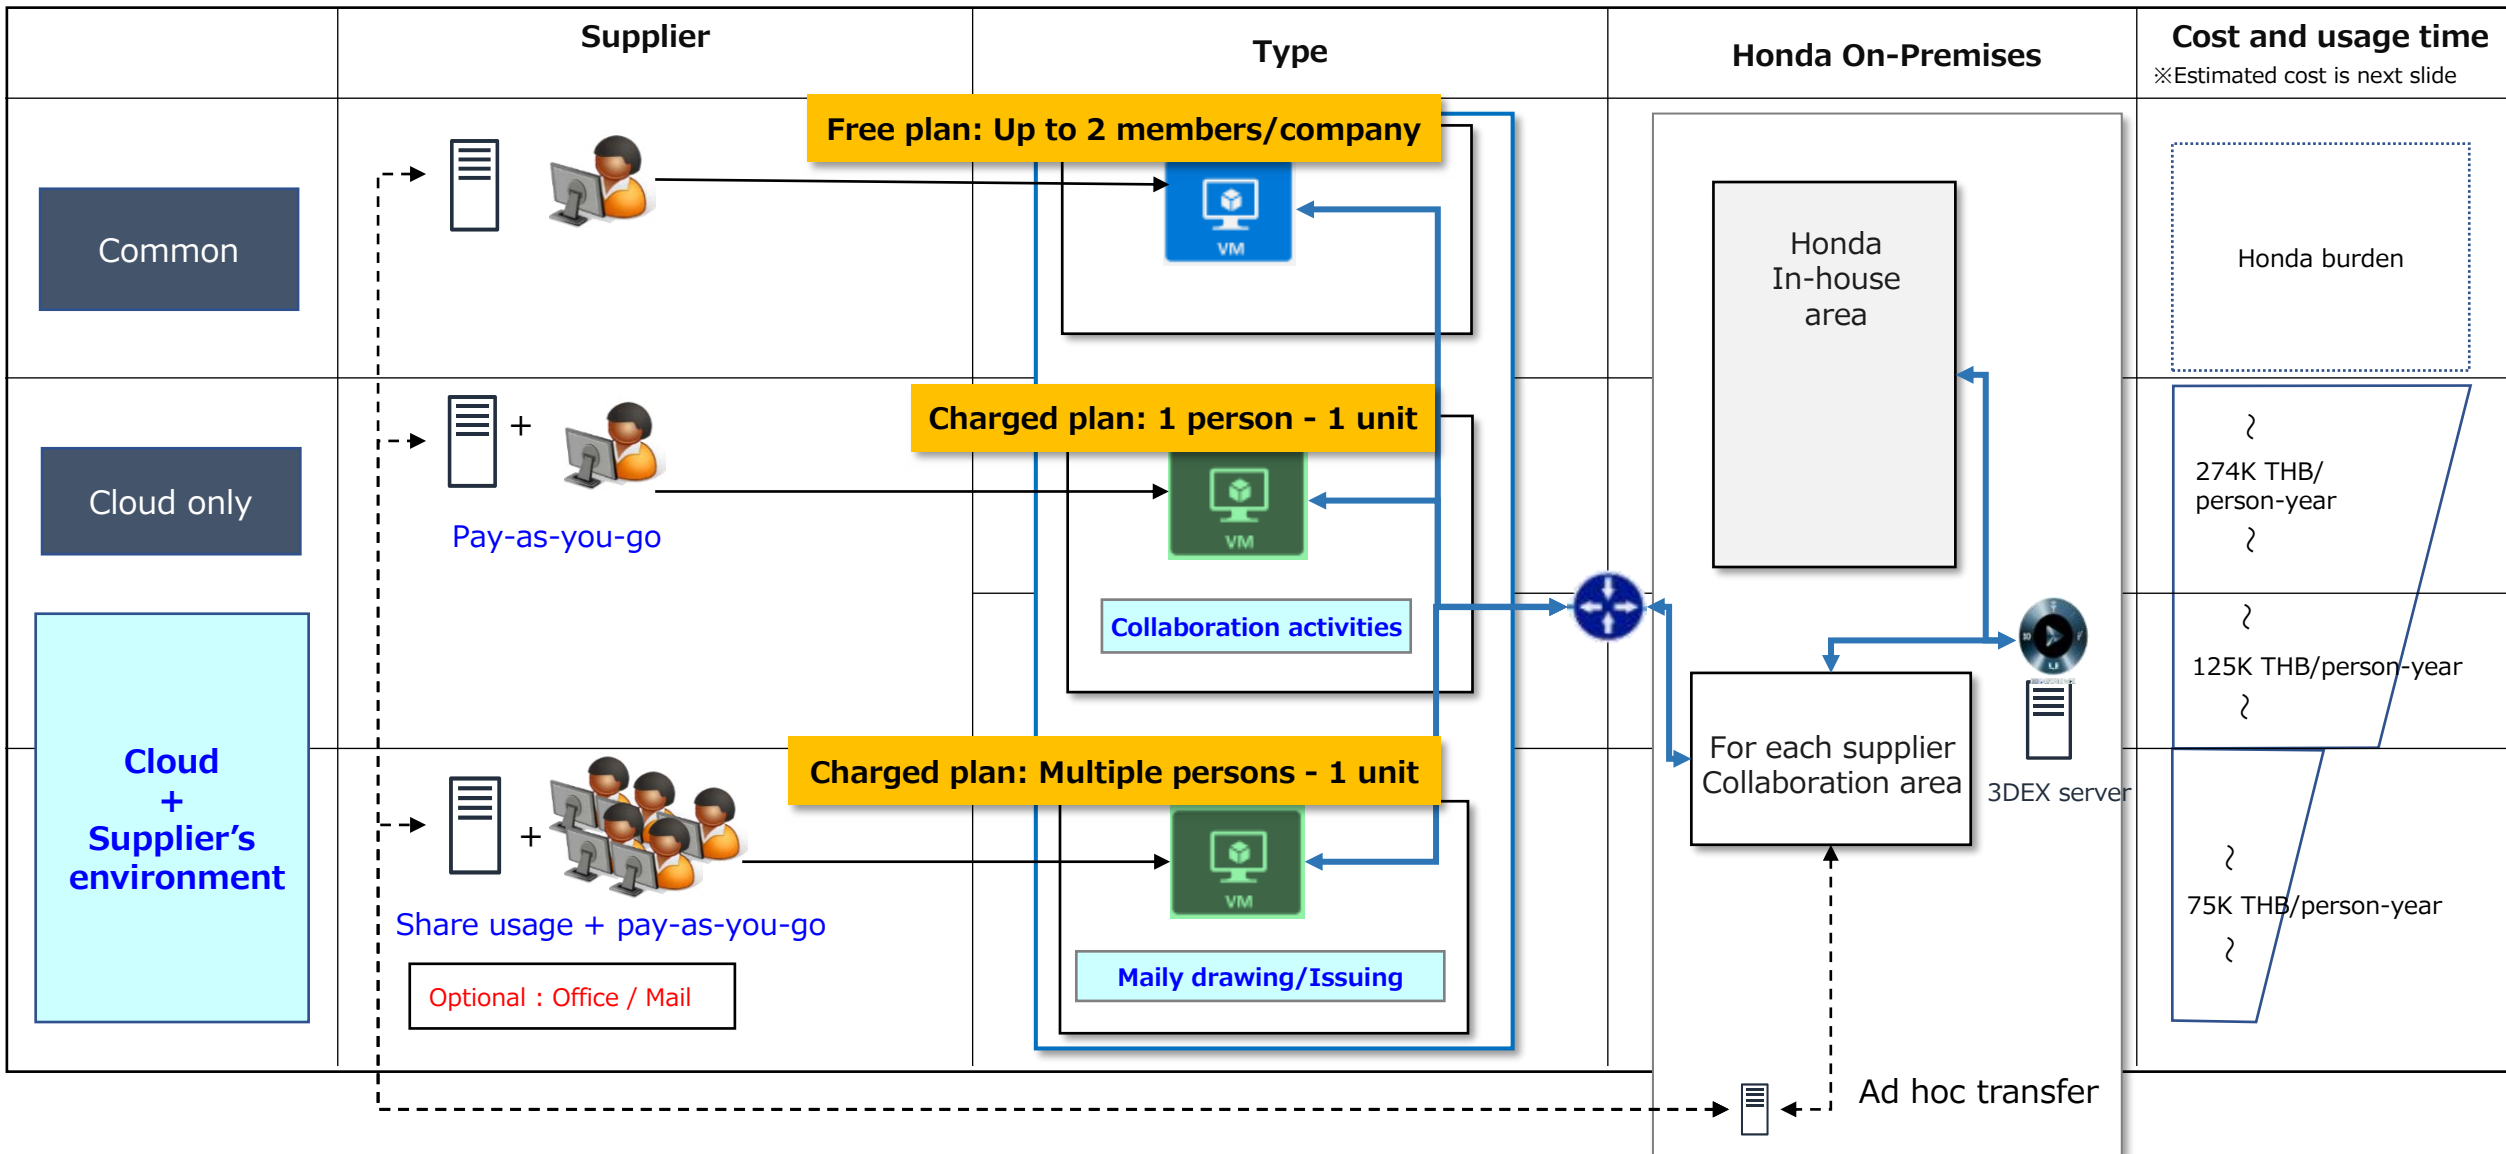

Make sure that the business partner's internal environment and the network for accessing satisfy the conditions below, including DARWIN 3D.

Classification	Category	Item	Remarks
Hardware	Device	Notebook PC or workstation	
	CPU	Intel Core-i5 equivalent	
	Memory	8GB or higher	
	DISK	HDD/SSD	Prepare the capacity according to the amount of data to be transferred.
	Graphic	OpenGL version-2 or later graphics adapter Graphics memory 512MB or higher	Onboard graphics enabled
Software	OS	Windows 10 64	Windows 32bit Not Supported ARM processor not supported (e.g. Surface Pro X)
	Other	Microsoft Visual C++ Redistributable for Visual Studio 2015	<ul style="list-style-type: none"> For Bulk Deployment with Lite3D Installer https://www.technia.com/support/software-downloads/#technia For individual downloads https://www.microsoft.com/en-us/download/details.aspx?id=48145
Network	Line Type	Internet line	
	Bandwidth	Minimum Bandwidth 15Mbps/User for CAD Usage as a Azure Cloud	This is the bandwidth required from a business partner to the Internet exit. • Classification by usage (CAD usage is classified into POWER) https://docs.microsoft.com/ja-jp/windows-server/remote/remote-desktop-services/remote-desktop-workloads • Bandwidth (for applications classified as POWER, the lowest 15Mbps is recommended) https://docs.microsoft.com/ja-jp/windows-server/remote/remote-desktop-services/network-guidance?context=/azure/virtual-desktop/context/context#applications
	Delay	Less than 50ms	As it varies depending on the environment, please check with the network check tool (next page)
	Firewall	Details will be provided at a later date	Cloud URL, Ports

Please prepare the environment that meets the above requirements

Plan Type

Please select a plan according to the actual usage of the supplier.

Cost for charged plan and Collaboration environment spec

Item	Supplier Collaboration environment user	
	Window person of design (Max. 2)	Other than the left side
Cloud environment	Honda burden	Supplier Burden
Enovia V6	Honda burden	Honda burden
CATIA V6	Honda burden	Supplier Burden
Development information (task management)	Honda burden	Supplier Burden
Development information (schedule management)	Honda burden	Supplier Burden

Item		Payee	Expenses	Detailed Description	
All	Basic charge (Monthly)	Honda	¥9,000/set ¥2,000/person (fixed)	Environment disbursement, registration, and management	Application processing, application management, new payout, suspension of use, configuration management/monitoring, maintenance
				QA/ failure response	QA failure response via help desk
				Management tool	Incident management, information distribution
Could environment	Microsoft SW licensing costs	Sales agent	Please ask Sales agent (fixed)	Windows 10/11 Enterprise E5... 1 unit/person	
				Enterprise Mobility + Security E3 (for client) ... 1 unit/person	
				Microsoft 365 Apps for enterprise... 1 unit/person *For Shared plan, this license is Optional	
				Exchange Online Plan2... 1 unit/person *For Shared plan, this license is Optional	
	Cloud Instances Usage fee	Sales agent	Please ask Sales agent (Pay-per-use)	<Usage environment> ■Instance ・ Certification machine: "Standard B2S Linux(2vCPU(s),4GB RAM),Standard Managed Disk E4(32GB RAM) × 1" . . . 1 unit/ company ・ AVDClient: "Standard D4v4 Windows10(4vCPU(s), 16GB RAM),Standard Managed Disk E10 (128GB RAM) × 1 . . . 1 unit/user ・ VDIclint: "Standard_NC4as_T4_v3 4vCPU(s), 28GB RAM, Standard Managed Disk E10 (128GB RAM) × 3" . . . 1 unit/user ■Additional Storage ・ "Azure Files(100GB)、Azure Backup(difference)(500GB) . . . 1 unit/user ■Others ・ Microsoft Defender for Cloud . . . 1/device + Cloud internal communication fee(30GB) . . . 1 unit/user	
CATIA V6	DS CATIA V6 License costs	Sales agent	Please ask Sales agent	If you already have DS Licenses : Register the licenses to managed DSLS tenant for supplier If you do not have DS Licenses yet. : New purchase or Migration from V5 license MES and TAD are mandatory, PCS (IFW and CSV) are not required	
				MES	Necessary for L/O, 3D modeling, kinematics creation, DPM construction
				TAD	Necessary for creating FTAs (dimensions / annotations) in 3D

Please prepare for the introduction of Collaboration environment.

Cost image for charged plan

Rate: 1USD=36.9THB
1JPY=0.23THB

Use case	Exclusive plan		Shared plan
Usage plan	Pay-as-you-go + 1 workstation/person		Pay-as-you-go + 1 workstation with 5 users
Basic charge (GUID,AHEAD)	30,360 THB ¥11,000 *12		10,488 THB / person (¥9,000+¥2,000*5)*12/5
MS SW Licensing	20,079 THB		10,426 THB / person (Option Ms office and Mail box:+9,653 THB)
CATIA Licensing	Prepared by supplier		Prepared by supplier

Annual Cost	274,206 THB	125,175 THB	75,425 THB

※This cost is for just reference.
Because the cost depend on contract between supplier and vendor

Setting usage plans according to usage conditions in response to pay-as-you-go/cloud handset shares

Preparation for Cloud and V6 licenses

•To use Honda Supplier Collaboration environment at the expense of a business partner, the following licenses must be prepared by the business partner.

Cloud environment	
AZURE Subscription ID MS licence	<ol style="list-style-type: none"> Contact Japan Business Systems Asia Pacific Pte. Ltd. Please consult "Issue Azure Subscription ID and Purchase MS Software License" for Honda digital Collaboration. (*) (*) About terms of use and costs, contact Sales agent. Contact: vmc-ap@jbs.com, Email Subject: [Honda Business Partner Collaboration Environments] Once "Azure Subscription ID, and MS Licensing" are delivered (*) from JBS to Honda Tenants, please inform the supplier help desk about Azure subscription ID and MS licensing information. (*) By registering AZURE subscription ID and license purchased by the supplier with Honda tenant, it will be used to link to the user at the time of application.

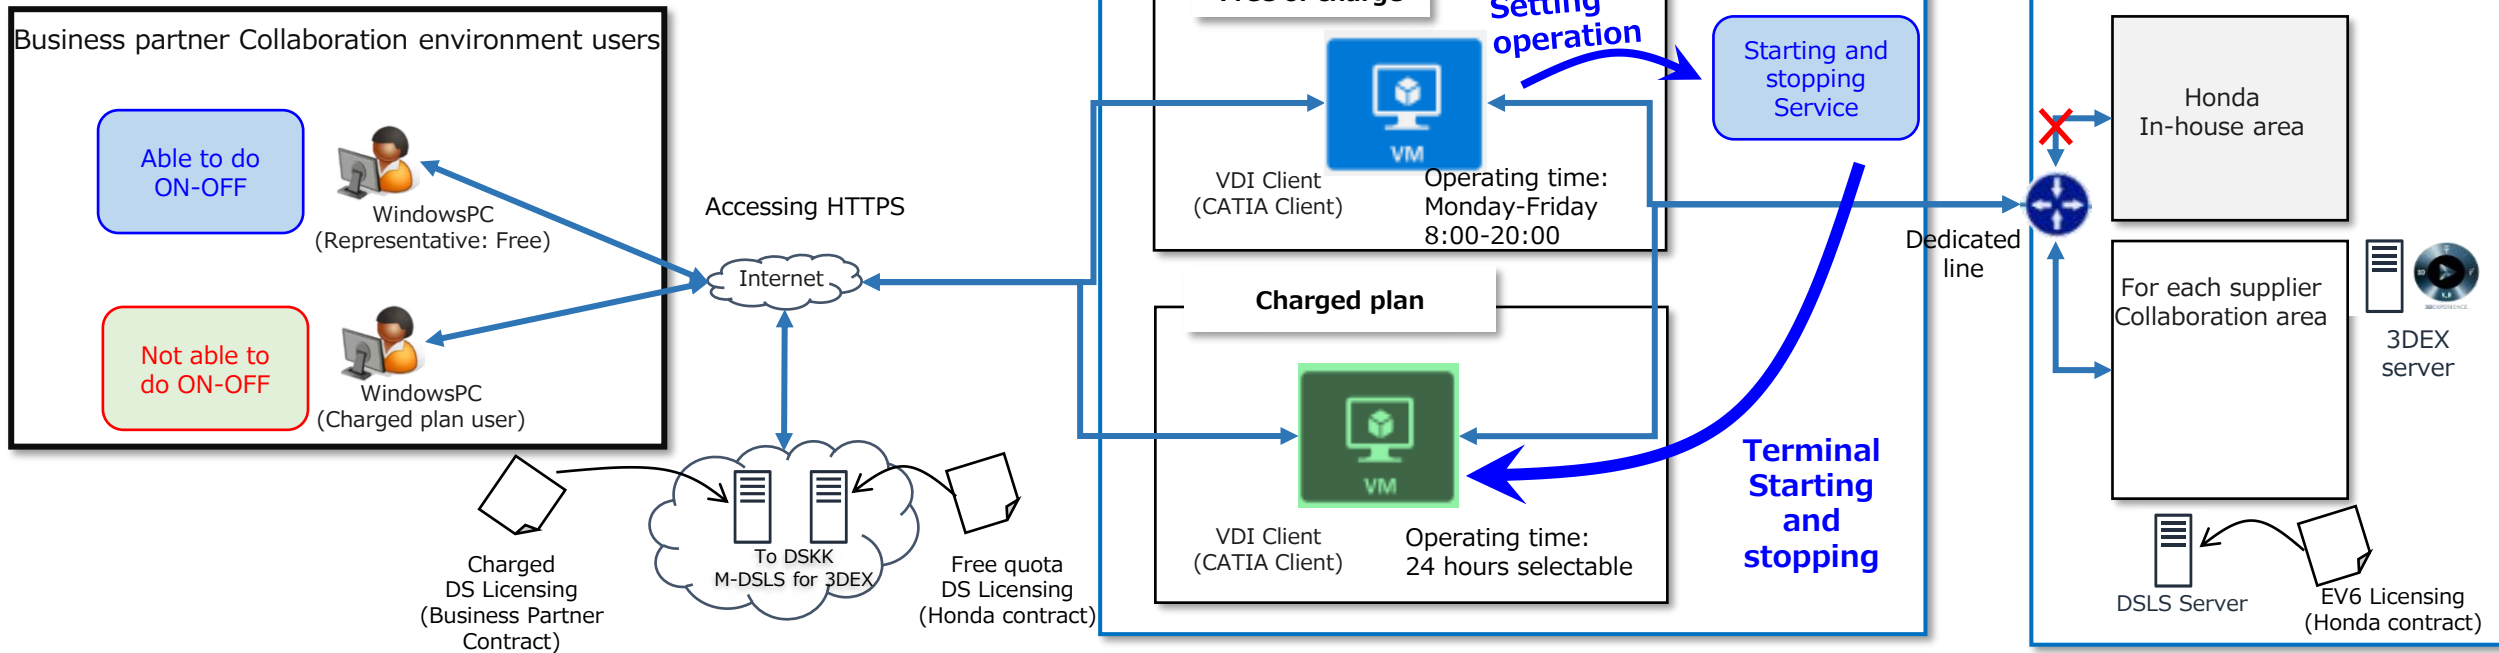

DS Licensing	
If you have CV6 licensing	<ol style="list-style-type: none"> Contact the distributor who purchased DS license for "Transfer License Registration to Managed-DSLS Tenants for Business Partners". After the license transfer to Managed-DSLS is complete, contact Honda Supplier Help Desk.
For CV6 unlicensed	<ol style="list-style-type: none"> Contact your DS licensing distributor with "DS licensing for Honda digital Collaboration". If you do not have a V6 license: Purchasing or migration from V5 license Mandatory licensing is MES, TAD. PCS(IFW, CSV) is not required in Honda supplier collaboration environments. REFERENCE DS LICENSING CONFIGURATION URL: https://www.3ds.com/terms/product-portfolio/licensed-programs/ Once you have purchased your DS license and registered your managed DSLS for your business partner with your DS license, contact Honda Supplier Help.

If you need "Charged plan user", please contact with Agency

How to ON-OFF cloud workstation

Methods	Definitions
pay-as-you-go	It can be used at any time in 24h by setting the operating hours of the terminals. ※Change the startup/shutdown time setting to the supplier representative (free frame) and use of the startup/shutdown tool

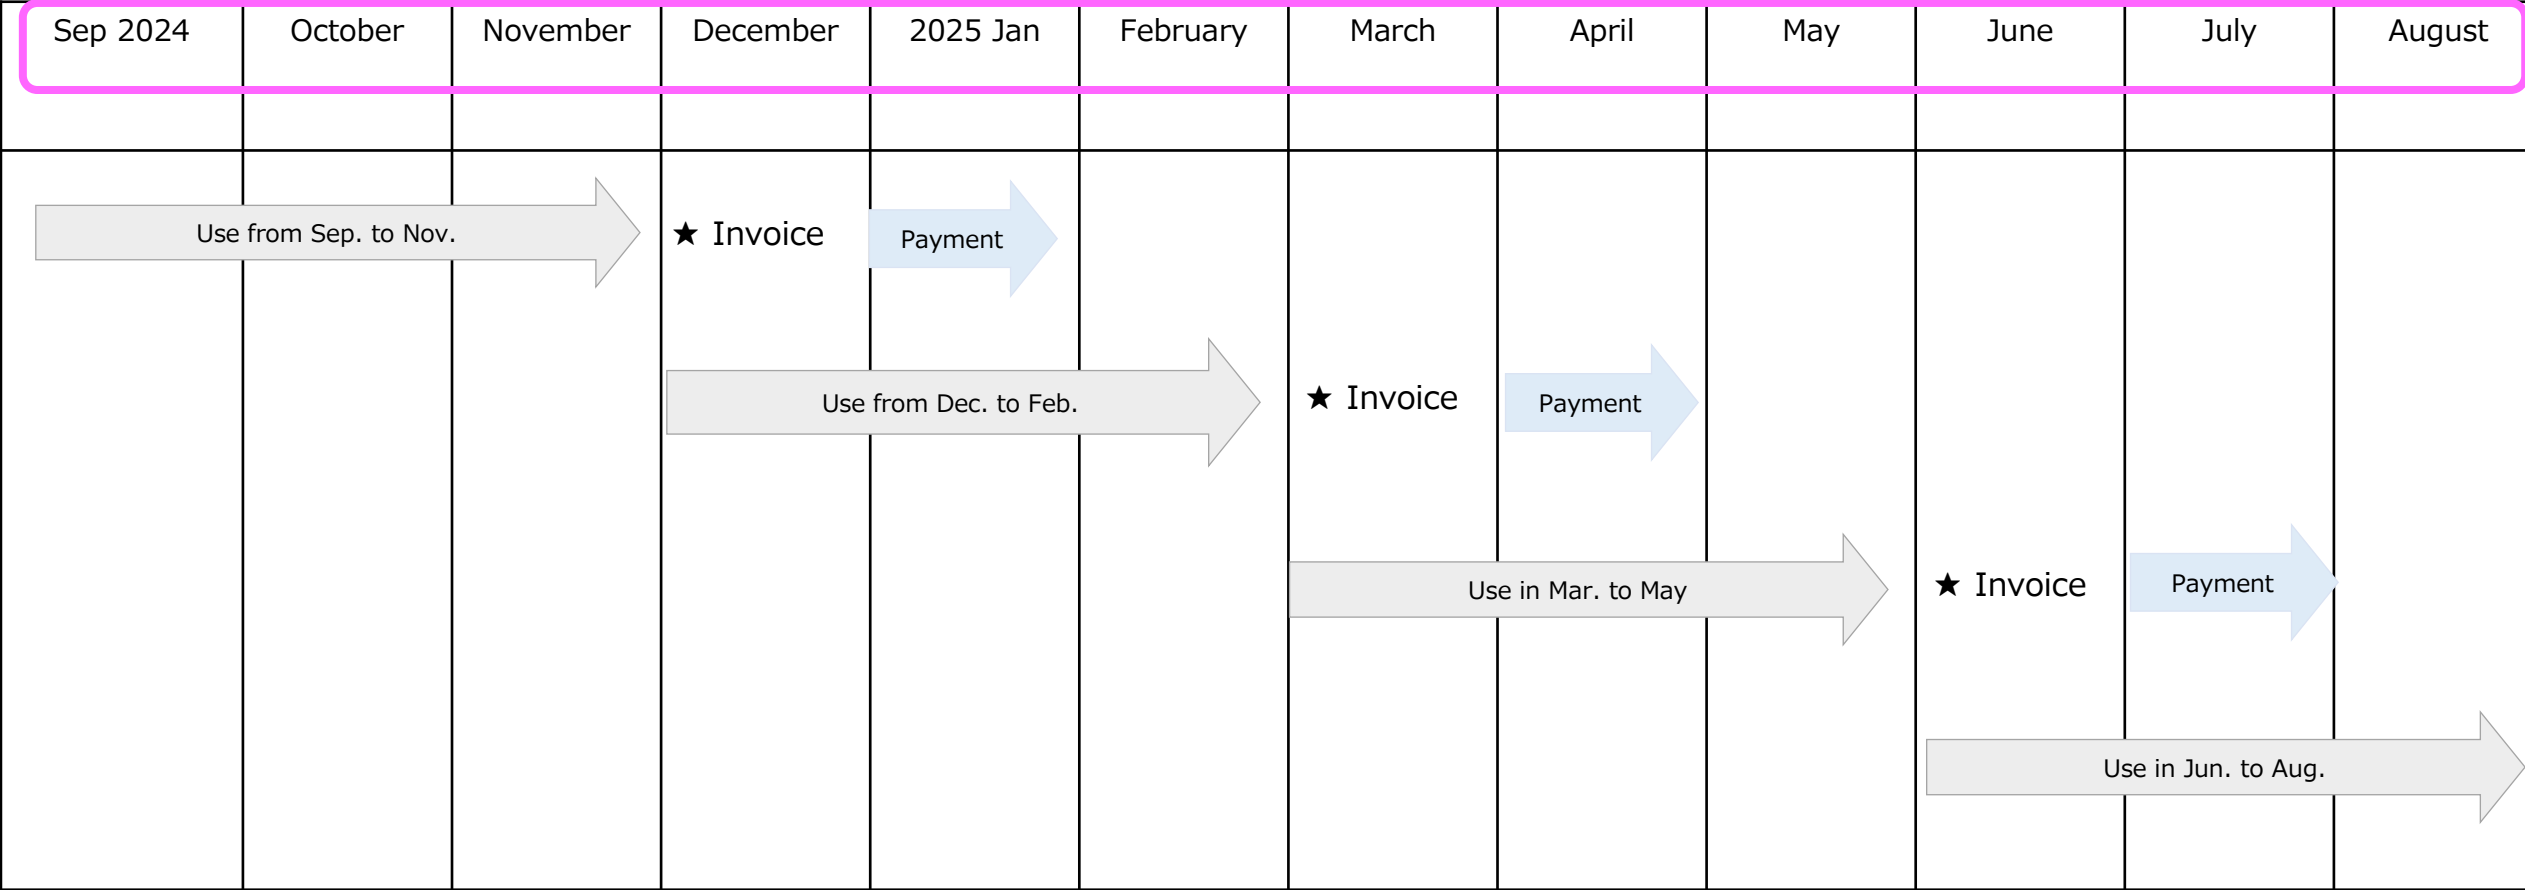

How to change the usage time setting

Allow charges only for usage hours and pre-configuration of usage hours

How to charge for “basic charge”

Timing: Charges are made **four times a year** (June, September, December, March)
Invoice Methods: Honda confirms the payment amount prior to the first month of the invoice, and Honda issues the invoice to the account at the end of the month of the invoice.
Payment: The counterparty makes payment within one month of receipt of the invoice.
Late Payment: If the late payment exceeds one (1) month, a late payment fee will be charged (the late payment fee will be charged at the next billing month).

For the basic charge, Honda will issue an invoice every three months and payment in the next month.

About Honda-Digital Collaboration Environment Phase1&2

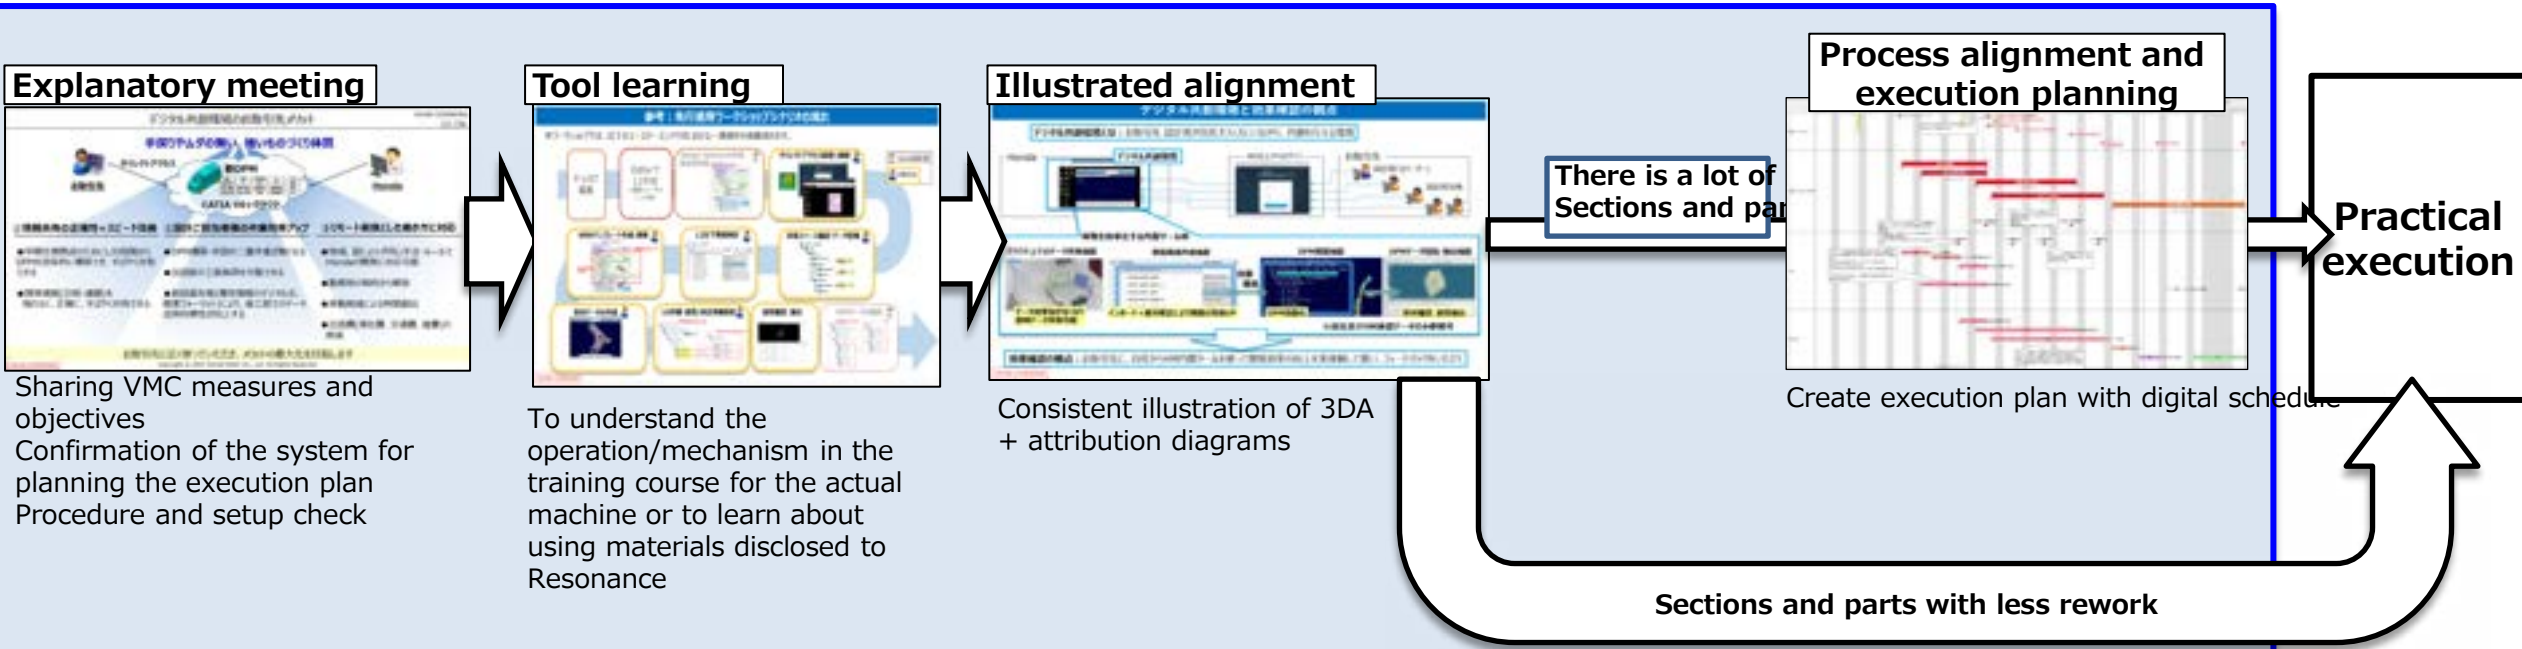

■ Purpose

Prepare for practical application of CATIA V6 and Digital Collaboration Environment by suppliers and designers.

■ Goals and methods

	Goal of practical application	How to proceed
Illustrated alignment	The prospect of drawing and drawing out of the applied part in CATIA V6 new drawing form shall be established.	Individual adjustment for each part between suppliers and Honda Design
Process matching	Between suppliers and HONDA designers, Agreement has been reached on an implementation plan for parts development that does not require rework in accordance with the model schedule.	

■ Activities

Preparing to use the Digital Collaboration Environment in actual operations

<Initiatives and Effects of Collaboration Process>

Classification		Description	Prospective effect <Person-day>
Rework to reduce	1. Clarification of the spec FIX schedule, 2. Clarification of L/O FIX schedule, 3. Optimization of verification schedules and contents, 4. Others 5. No effect (The reason is described in the content.)	By not changing peripheral L/O hardware such as component layout and colliding hardware, Prevent rework of biometric reflection	1.5
	Componen developm	Example ed in the initial stage of development, so	3
Efficiency Improve ment	a. Sharing the most recent and same CAD, b. Sharing the latest and same schedules and issues, c. Sharing the latest drawing data, Reduced drawing by d.3D plotting e. Others f. No effect (The reason is described in the content.)	By working on a schedule while sharing the newest L/O and issues with each other Can efficiently reflect production skills	2

Contact Comments : Taro tochigi	Thanks for the process alignment. Now that development issues and responses related to production skills have been materialized and their effectiveness has been clarified, we will ensure that planning is carried out in the model ***.
Comments from HM Manager : Jiro honda	Thanks for your understanding and cooperation in our efforts to improve efficiency. We believe it is essential to reflect this plan in development and products, so we request your cooperation in practice as well.

Deployment plan – Phase 2

Please cooperate with HRAP designer for Illustrated alignment and process matching from Jan'24

We have built a digital collaboration environment (CATIA V6+Cloud) for manufacturer drawings to strengthen Collaboration with our business partners.

In the future, in order to develop HRAP models, we will need to deliver drawings using CATIA V6 and have manufacturers draw the drawings at our suppliers using the cloud. We ask for the cooperation of our business partners in implementing this system.

We ask for your cooperation in coordinating the phased introduction between our design department and our business partners.

Finally, I would like to ask our business partners for their continued understanding and cooperation as we strive to realize "strong manufacturing" that will lead to Honda's growth and evolution. Please.

Thank you very much for today.

HONDA
The Power of Dreams

How we move you.
